Horkey Moore Plastics Division in New Plant in Torrance

Harkey - Moore Associates' recently formed plastics division has moved into a new 6000-square-foot building adjacent to the firm's main plant.

A modern, one-story engineering facility, it is equipped for fabricating large-size reinforced plastic components resistant to high temperatures and high pressures for aircraft, missile and space vehicle applications.

Contract work assigned by several military agencies and prime government contractors is in process at the new plant and employment is scheduled to reach 100 by the end of the year.

The Horkey-Moore Associates' plastics division is under direction of Vincent G. Gurley, assistant division manager.
