**LOMITA COMMUNITY CHURCH**

"The Foundation of the Church" was the subject of the morning sermon from the text: "And I also say unto thee, that thou art Peter, and upon this rock will I build my church; and the gates of hell shall not prevail against it."

In the new Testament we find the church described under at least three figures of speech: architectural, agricultural and physiological. A building erected upon a foundation, the vine and branches and the human organism—Christ the Head and the Church the Body.

Here we have the first. The rock is not Peter, but his confession: "Thou art the Christ, the Son of the living God." Because the confession exalts Jesus, we may say in fact, that Jesus Christ is the foundation. He is the Chief Corner Stone. The church is not built upon the learning, the eloquence, or the zeal of human leaders, but upon Jesus Christ. The church is not the material building of wood or brick, or stone, but, the company of believers who worship there. The church is the body of believers who love the Lord Jesus Christ, and serve him. All who then love and serve him are members of the church, no matter to what denomination they belong. Religion is not intended to be a minor matter of secondary interest. It is first: "Seek ye first the Kingdom of God and His righteousness."  
In the evening the pastor spoke upon the "Fatherhood of God." The hymns of this service set forth this theme.

**THRIFT A NECESSITY**

From a statement by Lew Wallace, Jr., Director U. S. Government Savings System, Washington, D. C.:

Thrift is necessary to national existence. When a people cease saving and turn to waste and extravagance they begin to degenerate, their government begins to decay and the life of their nation is doomed. All the world has shown that a thrifty people are a progressive people and a prosperous people, advancing steadily in industry, intelligence, independence and good government. Saving money is not miserly; it is wisdom. Hoarding money is miserly and wasteful, because it clogs the life blood of commerce. Saving money and investing it, on the contrary, means that money is put to work, earning for the investor and providing capital for industry and trade.

The United States Government has become actively engaged in a great movement for thrift and saving. It is reaching out for the hoarded and hidden money earned by the timid; it offers them a safe investment and a high rate of interest. The Postal Savings System has been in operation more than twelve years and has been a success. It still affords one of the best mediums for people who can save only small amounts at a time. Ten cent stamps are sold and when a person has ten stamps they can be exchanged for a \$1 interest-bearing postal savings certificate. Postal savings have proved very popular, many people having purchased the limit of \$2500.

The government also offers Treasury Savings Certificates for those who want to invest in larger amounts. They are sold in denominations of \$25, \$100 and \$1000 at \$20, \$80 and \$800. These certificates are exempt from state and local taxation (except estate and inheritance taxes) and from the normal Federal income tax, paying 4 1/2 per cent interest compounded semi-annually, redeemable in five years. They make a most attractive investment for the person of small

**FIRE LAWS.**

Stuart J. Flintham, county fire warden, has inaugurated a campaign against the violators of the county and state fire laws. He and his deputies are being kept very busy now that the hills are getting dry.

Small fires have occurred already, but no great damage done as the county fire warden has a well organized crew of trained fire fighters and can have a deputy at a fire in a few minutes after it starts. In this way, a very small percentage of fires get beyond control.

The county fire warden is trying to educate the people of the danger and damage done by fire. In this way save the watersheds throughout the county.

Torrance Fiesta, August 15-19

means, the wage earner, the farmer, and for the women and children who are striving to save money in small lots.  
Postal savings and treasury certificates can be obtained at any post office. The post office thus becomes the bank of the small investor. Every person with a little money to save can easily reach a post office, and once the money is in the hands of the government it is absolutely safe. It begins to earn money as soon as a dollar is invested. By postal savings and by the sale of War Savings Stamps the government has created a spirit of thrift and saving. It intends to foster that spirit and build its saving system stronger and better, not only for the benefit of the people themselves, but for the good of the United States as a nation.

We are trying to reach the people who have money they should invest, but who will trust no medium than the government. The government desires to sell its securities and wants to place them far and wide. It wants every person to become its partner. It wants to use their money and pay them a fair rate of interest for it. That is why the United States today has become one of the strongest and the most important factors in the thrift and savings movement.
