The Oliver Disc Plow

And Now-Profit in Farming Without the Drudgery

FORDSON power makes more productive seed beds and the tractor does its work so rapidly that farm drudgery is passing. Expenses are reduced. Better crops are grown.

For the job of plowing tough or sticky soils, Fordson farmers use the OLIVER DISC PLOW and do the work easily and well. The thoroughness of its work has made this plow standard equipment with the Fordson.

Penetration in the toughest soils is assured by the design of the plow which throws its weight to the cutting edge of the discs where they enter the ground. This penetration is easily varied for different soils. By simply turning a crank screw, the penetrating power is increased or decreased.

Improved scrapers give a mouldboard effect. They leave a well pulverized seed bed and cover all trash.

To farm the new way means so small an investment that it is within easy reach of every farmer. Come in and see the Fordson and the OLIVER SPECIAL DISC GANG for the Fordson, and you, too, will decide to be a Fordson farmer.

ANNOUNCEMENT-

We the undersigned, have incorporated a Shoe Store, combined with shoe repairing, known as "THE LOMITA SHOE HOSPITAL," for reasons that it represents the most scientific shoe man in the country. Said man is known as the "Shoe Doctor" of Los Angeles, and all large cities of the state and is very proud of his name. Because he can show and prove to the public that he can and does do the most scientific work to be found in this part of the country. He does it with torisiam for the public; he makes his living from the public; all he asks the public is to give him a trial for which he will appreciate very much. To show the public that he is right, he will start from the 10th until the last of the month of July—that means (20) twenty days to put on all kinds of rubber heels (it does not make any difference what kind) for 25c per pair.

- Gentlemen's Half Soles only.....\$1.00
- Ladies' and Boys'......85
