FINE POINTS IN ENGLISH

The man had just informed the Pullman agent that he wanted a Pullman berth.

"Upper or lower?" asked the agent.

"What's the difference?" asked the man.

"A difference of 50 cents in this case," replied the agent. "The lower is higher than the upper. The higher price is for the lower. If you want it lower you'll have to go higher. We sell the upper lower than the lower. In other words, the higher the lower. Most people don't like the upper, although it is lower on account of it being higher. When you occupy an upper you have to get up to go to bed and get down when you get up. You can have the lower if you pay higher. The upper is lower than the lower because it is higher. If you are willing to go higher it will be lower."

But the poor man had fainted!
