NUMBER 20 OSTEOPATHIC ACT ON BALLOT

The osteopaths of Southern California, who have opened an intensive campaign for the passage of No. 20, the osteopathic act on the November ballot are quoting Benjamin Rush, M. D., Surgeon General of the Continental Army, and one of the signers of the Declaration of Independence, who gave this advice:

"To restrict the Art of healing to one class of men and deny equal privileges to others will constitute the bastille of medical science. All such laws are un-American and despotic. They are vestiges of monarchy and have no place in a Republic. The constitution of the Republic should make special provision for medical freedom."

Dr. Harry W. Forbes, president of the California Osteopathic Association says:

"Number twenty is an initiative brought by 80,000 citizens of California who believe in medical freedom and fair play.

"The one purpose of this act is to obtain for osteopaths the same fair administration of the existing examining and licensing laws that is now enjoyed by the medical doctors, dentists, optometrists and pharmacists. Each of these professions has its own licensing board. There is no desire to change the existing licensing law or the educational standards. The act provides only that the Governor and a self-sustaining examining board of five licensed and practicing osteopaths to be selected by him shall carry out the provisions of this law for osteopathic physicians and surgeons.

"The present law contains no provision for the issuance of licenses to practice osteopathy, homeopathy, allopathy, etc. It requires that in order to obtain a license to practice, the graduates of all these systems must have had the same nine years of education and must pass the same three day written examination, which includes every medical and surgical subject. The law specifically provides that the license shall read 'Physician and Surgeon Certificate.' For fifteen years osteopaths have met these requirements, and now have the same form of license that the medical doctors hold.

"The present board consists of eight medical doctors and two osteopaths. In 1919, by a vote of 8 to 2, they decided to examine no more osteopaths. This refusal to examine was taken to court, where Judge Wellborn, after exhaustive investigation, decided that our college more than met the requirements of the law. In addition to the 4000 hours of study required at other medical colleges, we have a thousand hours of purely osteopathic subjects. It is not for omitting any of their requirements but for adding to them that the effort is being made to reject and suppress us. Judge Wellborn's decision has been recently upheld in the Supreme Court.

"The medical examining board is not connected with the state board of health, and number 20 does not change or nullify any rulings of that board, nor effect any narcotic law.

"The passage of number 20 will save the taxpayers thousands of dollars by ending the 28 years' constant court and legislative battles between osteopaths and medical doctors."

The osteopaths say that the thousands of people who are receiving daily benefit from osteopathic treatment must rally for the passage of number 20, or the time may come when it will be impossible for them or their children to get such treatment, when systems of cure will be dictated by the medical class who hold the power. They draw attention to the fact that osteopaths now licensed in the state have nothing to gain personally from the passage of No. 20. They are working that osteopathy may live after them.

Mrs. Sara Harding of Pasadena was the guest Sunday of Mr. and Mrs. Frank J. DeWitt of Pennsylvania and Fir streets.

Mr. and Mrs. C. J. Brown of Los Angeles are spending six weeks in Phoenix, Arizona. Mrs. Brown will be remembered as Opal Lowe, daughter of Mr. and Mrs. Lynden Lowe, of Lomita Heights.

The Lomita friends of Mrs. Dr. Bennett, of Los Angeles, will be glad to learn that she is recovering from an attack of double pneumonia. Mrs. Bennett is the sister of H. R. Tulp, of Narbonne avenue.

Mrs. S. C. Card, of Gardena, was renewing acquaintances in Lomita Monday. Mrs. Card was formerly Mrs. Emma Edgell, of Weston street.

Mrs. V. Platnicki of south Narbonne avenue was agreeably surprised last Thursday when several ladies dropped in for a musical afternoon. The hostess served tea to the following guests, Mrs. W. A. King, Mrs. C. R. Thistle, Mrs. M. Mikelson and Mrs. Ernest Wilcox.

Albert Martinson, who has been ill at his home here, for several days, returned this week to his work with a structural iron company of Los Angeles.

Miss Irene Mills and Miss Laura Thomas will entertain at a house party over the week-end members of the Christian Endeavor of the San Pedro Presbyterian church.

Mrs. Margaret Nicholson will return to her home in Taft, Saturday after spending some time with her sister, Mrs. Henry Kettler.

SHALL SCIENCE GIVE WAY TO THIS LAW?

"Sometimes you can't believe even when you see them—pre-Volsteadian pink monkeys, for instance, well, would you believe your eyes if you read on the California ballot a law to prohibit the use of canary birds to test mine gas, as was done at the Argonaut mine?"

Credible or incredible, it was there; and unless you do believe your eyes when you read it, and vote against it, just this preposterous prohibition will soon be a law of California. Then there will be no way to test the safety of mine air except to go in yourself and see if you drop dead. For on no account under the miscalled 'anti-vivisection' initiative, must such tests be performed on 'any living creature lower than man.'

Other features of the proposed measure are almost equally beyond belief. It is a bill not against cruelty, but against science. In plain words it expressly authorizes painful operations, without anaesthetic, if the purpose is the convenience of farmers, but it prohibits the same operations, even under anaesthetic, without pain, if the purpose is the advancement of knowledge. You may poison a rat to get rid of it, but not to test a drug or to find out whether food products have become unsafe. No experiments may be performed by the minority agricultural investigators to propagate fungous diseases for the control of orchard pests, and all the work against hog cholera, anthrax and other livestock diseases must stop.

The farmer may dehorn or castrate cattle, painfully, to save himself trouble, but Professor Loeb must not change the salt-content in the sea-urchin tank to delve further into the mystery of life. Animals may be killed for food, but not for the advancement of knowledge. Cows may not be tested for tuberculosis, if the purpose is to protect the lives of babies, though they may be treated for it, if the purpose is to benefit the cows themselves. The botulinus investigations, to establish the safety and marketability of California canned goods must stop. We may poison our customers, but not a laboratory guinea pig. Diphtheria antitoxin and small pox vaccine may not be made in California, and if imported from elsewhere they may not be tested here. Hydrophobia may not be treated at all; if you are bitten by a mad dog you must die, since to save you would cost the life of a rabbit.

All these things are prohibited 'with or without anaesthetic,' if for scientific purposes, while very painful operations, without anaesthetic, are expressly authorized for other purposes. More than 99 per cent of the pain now inflicted on animals is authorized to continue, while scientific investigations, more than 99 per cent of which are painless, are prohibited.

Unless California is henceforth to be omitted from the advancement of human knowledge; unless the scientific departments of its universities are to close; unless the precautions for the control of epidemics and the relief of the ailing now universal among civilized manhood are to be excluded from California; unless our livestock industry is to be destroyed, our fruit crops blasted and our cannery industry bankrupted; unless even our mines are not to be made safe—this, the maddest measure which even fanaticism has yet devised, must be kept from the statute books of California."

TRIO REBEKAH NOTES

Last Wednesday evening, District Deputy Merrill, of Long Beach, was present when the Initiatory work was put on by the Trio Rebekah Lodge. There were a number of visitors present from Redondo, Eagle Rock, Huntington Park, Los Angeles and San Pedro. The hall was beautifully decorated, and a delicious banquet was served.

Mr. and Mrs. Arthur Olson, of San Francisco, who are on their honeymoon, were recent guests of Rev. and Mrs. E. E. Clark. Mr. and Mrs. Olson returned to San Francisco Saturday on the Harvard.

Through the agency of W. A. Tagarden, H. J. Myers, of Wilmington, has purchased on Luwile street, from C. B. Bell, of Redlands, Mr. Myers will erect a modern home in the near future.

Linderman and Ducker have the contract for the laying of sidewalk from Stock's Feed Store on Narbonne avenue to Rose street. The work will start immediately.

Mr. and Mrs. J. H. Worthington of Chestnut street, with Mr. and Mrs. J. P. Worthington and children of Redondo Beach, returned Tuesday from Berkeley where they visited Mrs. Mary Moore for ten days. Mrs. Moore and Mrs. J. H. Worthington are sisters.

Your ancestors worried along rather creditably without some things you think are indispensable. Public business will take on a more serious aspect when it becomes necessary to go out and drag a man into office.

This seems to be a great year for dusting off political hasbears and trying to make them presentable to voters.

Congress would readily solve the bonus problem if somebody would donate about five billion dollars to make the payments.

It is predicted that the country will soon be clamoring for cars to haul its goods. There does not seem to be such a thing as a happy man.

If Kidneys Act Bad Take Salts

Says Backache often means you have been eating too much meat.

When you wake up with backache and dull misery in the kidney region it may mean you have been eating too much meat, says a well-known authority. An excess of meat may form uric acid, which overworks the kidneys in their effort to filter it from the blood, and they become sort of paralyzed and clog. When your kidneys get sluggish and clog, you must relieve them, like you relieve your bowels, removing all the body's urinous waste, else you have backache, sick headache, dizzy spells, your stomach sour, tongue is coated, and when the weather is bad you have rheumatic twinges. The urine is cloudy, full of sediment, channels often get sore, water seals, and you are obliged to seek relief two or three times during the night.

Either consult a good, reliable physician at once, or get from your pharmacist about four ounces of Jad Salts take a tablespoonful in a glass of water before breakfast for a few days and your kidneys may then act fine. This famous salt is made from the acid of grapes and lemon juice, combined with lithia, and has been used for generations to clean and stimulate sluggish kidneys, also to neutralize acids in the urine so it no longer irritates, thus often ending bladder weakness.

Jad Salts is inexpensive, can not injure, and makes a delightful, effervescent lithia water drink. Drink lots of soft water.

DISABLED VETERAN'S HOME

The first disabled veteran to be sold a home by the State of California under provisions of the Home and Farm Purchase Act, passed by the last legislature, is Owen W. Myers of 261 North Townsend street, Los Angeles, according to announcement issued yesterday by Captain Frank H. Nichols of the Veterans' Welfare Board.

Myers, with his mother and sister, is installed in a modern bungalow, and is paying \$26 per month to the state to cover interest and principal payments on a loan of \$5,000. At the end of twenty years the title will be transferred to him, or in the event of his death before that time his heirs may continue and complete the contract. Myers was paying \$45 per month in rent for a less desirable home just prior to the purchase of his present home by the state. He is keeping up his payments out of government compensation for total disability.

It usually costs considerable money for a man to discover that he is not making any in his business.

The next congress will be expected to tinker with the work of this one, and it will not disappoint.

There is no use in trying to reason with automobiles which have started to climb telephone poles.

You see some persons doing things as foolish as the farmer who drove rats away by sprinkling a rat with kerosene and setting fire to it. There was no insurance on the barn.

Occasionally you meet a group of persons who give the impression of the survival of the fittest.
