WIFE SAVERS

Simply wash the sweet cherries well and put on the table in a large bowl with some green leaves to add to their attractiveness. Put a small plate at each place and let the family or guests help themselves to the luscious fruit.

A small oven that may be placed on top of the stove is nice to bake the biscuits for breakfast. Make the biscuits over night, cut them out and let them stand in the box until morning.

Birds' Nests.—Take about two cups of hot mashed potatoes, season well with butter, salt and pepper. Add half a beaten egg and make into balls. Place on a buttered pan and press into each the bottom of a small cup to make the nests. Mix some chopped cold roast beef or a piece of tough steak which has been pan-broiled and chopped with some well seasoned tomato sauce and fill the nests. Brush each one over with the remaining half of egg and put in oven to brown.

Salmon Salad.—One can salmon drained from oil and flaked, one cup diced celery, eight or ten chopped olives, one sour pickle; mix, season with salt and pepper. Serve with mayonnaise or lettuce leaves.

PAPER CURTAINS

Did you ever hear of tissue paper curtains? Numbers of women who are tired of washing curtains in the summer time when the open windows let dust blow in in sheets are using curtains of fine, high grade tissue paper for nurseries, bedrooms, etc. Two sheets of the paper are gathered with a heading at the top and a hem pasted at the bottom, making a dainty curtain that from outside cannot be distinguished from the sheers of muslin. They save laundry bills or personal labor, are easily made, cost very little, and can be easily changed. Charming effects can be achieved, too, by pasting on the white background borders of birds, butterflies or flowers to harmonize with the room colors.

Squash, either of the summer or winter variety, does not keep long. Summer squashes grow quickly and spoil quickly. When they are old they become tough and woody. Select the young squash, the skin of which may be pierced with the thumb nail. Keep cool and use within a few days at longest.

It is always an excellent plan before washing curtains to shake out the loose dust and then soak them over night in cold water. If the water becomes very dirty the curtains should be soaked again before thoroughly cleaning in fresh water.

In baking drop cookies an aluminum griddle is even better than a cookie sheet, especially for cookies containing fruit and nuts.

Never dredge steak with salt and pepper before cooking, as the salt will extract the juices.

Beet Salad.—Six canned or cooked beets of uniform size, one-half cup chopped sweet peppers, one-half cup celery or finely chopped cabbage, lettuce, French dressing. Drain and rinse the beets, then hollow out to form a cup. Mix what is taken out and chopped with pepper, celery or cabbage. Moisten with dressing and pile in the beet cups, set each in a nest of lettuce, and sprinkle with dressing.

Enough beets may be cooked at noon to be served for the two meals unless the family objects to the repetition of the vegetable. They may be served in different ways.
