Mr. and Mrs. Monroe Gamby and daughter were guests Sunday of Mr. and Mrs. Charles Wentz of Eshelman avenue.

Football-Indian Picture Is Booked at Torrance Theatre

ROD LA ROCQUE and TYRONE POWER in "BRAVEHEART"

Recognizing the fact that a talented star, a good story and a competent director may produce only a mediocre picture without strength in the supporting cast, Director Paul Sloane devoted much attention to the selection of a cast for "Made for Love." Leatrice Joy's new starring vehicle, which will be on view at the Torrance Theatre Thursday and Friday.

As a result, every role is properly portrayed. Opposite the star is Edmund Burns, who with Miss Joy made an entertaining combination in "Hell's Highway," Cecil B. DeMille's first independent release. Ethel Wales, of "Covered Wagon" fame, was chosen for an important character part following her excellent work in "The Wedding Song," in which she also supported Miss Joy. The heavy role is filled by Bertram Grassby, an English actor, who gained recognition by his work in such pictures as "Midchannel," "The Fighting Chance," and "Fifty Candles."

One of the most realistic football games ever screened is shown in Rod La Rocque's new star picture, "Braveheart," which will be on view at the Torrance Theatre Saturday. Inasmuch as La Rocque and Alan Hale, the director, are football experts, the details of the game are so deftly handled as to win the enthusiastic praise of all who see the picture.

"Braveheart" is the son of an Indian chief who is sent to college to learn the white man's ways of doing things, so that the Indians might recover certain fishing rights vouchsafed to them by a treaty, but of which they were arbitrarily deprived. Braveheart falls in love with Dorothy Nelson, a white girl, played by Lillian Rich, and her brother Frank with Braveheart is a member of the college football team.

Visitors to the slums of a large city should always bear in mind that any street brawl they might see is not necessarily an invitation to a private little scrap with outside interference not wanted. By the same method of reasoning placed in the same surroundings mentioned above one should never allow the "big brother" idea to run away with his sympathies even though over of the combatants is much smaller physically than the other. "Coot" Caddigan, a cow-puncher, did this while touring the Chinatown district of a large city. How he paid for it is thrillingly told in "The Arizona Sweepstakes," Universal-Jewell, coming Sunday and Monday to the Torrance Theatre, with Hoot Gibson in the leading role.

"Ridin' the Wind," the new Fred Thomson production made for F. B. O., which will be shown at the Torrance Theatre next Tuesday and Wednesday, might well be called "Riding the Gale of Mirth," for its laugh-producing qualities are such that a pessimist might safely be deflated as one who had seen this picture and failed to burst into a fit of laughing fits, and with the most adroit and amusing situations, the action of "Ridin' the Wind" is as speedy as its name would attest.

service. To facilitate the movement of planes in and out of the building, sliding doors designed to open the entire length of the hangar will be installed. This feature will be made possible by the use of a cantilever type of roof.

The property is but six miles from the Chicago assembly plant of the company at Hegewisch and is in excellent condition for use as a landing field.

Bassett Points Out Commercial Value of Autos

Quick President Sees Cars as Aid to National Prosperity

By H. H. BASSETT
 President Buick Motor Co.

Few people stop to realize what an important part the automobile plays in our national prosperity, and how closely allied their fortunes are with its success. Many industries are directly dependent on it. Many others would suffer a huge loss in business should automobile production cease.

This does not apply alone to the many dependent industries which sprang up in the wake of the automobile, such as accessory manufacturers, body builders, wheel makers, tire manufacturers, and others. Basic industries which were important long before the automobile was invented now draw a large share of their business from the automobile manufacturer. The latest figures of the National Automobile Chamber of Commerce prove this.

Keep Industries Busy

For example, such important industries as iron and steel, aluminum, plate glass, leather upholstery, rubber, gasoline, and lumber (hardwood) draw a large portion of their annual business from the automobile industry. An average of 52 percent of all the products of this group is consumed by it.

Rubber and gasoline are the most dependent, 30 percent of all produced being used by the automobile. Next comes leather upholstery with 69 percent. The industry uses 52 percent of the plate glass, 46 percent of the aluminum, and 11 percent of all the iron and steel produced in this country.

In addition, the railroads of America handled 3,040,000 carloads of freight for the automobile industry last year. Scores of smaller industries are also more or less dependent on it for their business.

Says Cars Necessary

It must be admitted that a large part of our national prosperity is due to the popularity of the automobile and the huge annual production of this popular item. It is possible, if the automobile tax shows that there is a growing acceptance of these facts throughout the country. People are beginning to realize that automobile production is beneficial to everyone.

Mrs. W. H. Alexander spent part of last week at the home of her son-in-law John Lowe, who is seriously ill.

Mr. and Mrs. Tom Hartman of Poppy street spent Sunday with relatives in Culver City.

Mr. and Mrs. Ernest Engelbret, here recently from North Dakota, have rented an apartment on Redondo boulevard. Mrs. Engelbret is a sister of Mrs. P. H. Thompson.

Ford Erects Big Landing Field on Route to Chicago

The Ford Motor Company has purchased 1400 acres of land at Maynard, Ind. The property, which is located on the Illinois-Indiana state line, approximately twenty-five miles southeast of Chicago, will be utilized as the Chicago terminal of the Ford Air Transport service. Since the establishing of the Detroit-Chicago air line on April 13, 1925, Ford planes have been landing at the government field at Maywood, Ill. Considerable difficulty was experienced by Ford pilots in reaching the landing field, due to smoke and fog settling about Chicago. This will be avoided by the new location, which removes the necessity of traversing the metropolitan district.

In announcing the purchase the company stated that the property will be utilized only as a landing field.

"The Ford Motor Company intends no manufacturing activity of any sort and contemplates building no more than a hangar for the shelter and servicing of airplanes," the statement said.

The hangar incorporates several unique features of construction and many of the most modern facilities for servicing airplanes. The building, which will be 123 feet wide and 103 feet long, will be so constructed as to adapt itself to future expansion in line with future development of the air transport

Los Angeles Limited

The Observation Car Parlor on the Los Angeles Limited

THE observation parlor of this famous train affords a luxurious comfort equal to that of a smart private club.
