Puzzle—Find the Clouds in This Picture

The cloud in the sky and the Reo Flying Cloud on the ground are easy. But who would know that the young lady is Miss Dorothy Cloud, an employe of the Reo Motor Company in Los Angeles? The plane is a cloud-maker, being operated by Rogers' Airport to produce sky decorations when and where wanted by moving picture directors.

There are three kinds of clouds that are not in the encyclopedia, and the purpose of this story is to set the encyclopedia right.

First, there's Miss Dorothy Cloud. Second, there's the Reo Flying Cloud. And third, there's Rogers' airplane cloud-maker.

In order to get these three all together it will be necessary to go back to last January and re-read the announcement of the Reo Motor Car Company saying that their new automobile would be named the Flying Cloud, after the fastest American clipper ship ever built.

Almost immediately thereafter Miss Dorothy Cloud steps into the picture. She arrives at the Reo headquarters in Los Angeles seeking a position and, what with her name fitting into the picture so nicely, together with the fact that she throws a mean pothook and

knows her way around an Underwood, she finds herself on the payroll.

With material like this at its command the Reo publicity department could be excused for using one of those girl-with-a-car pictures; but, showing remarkable restraint, the corps of publicists publicizing Reo waited. And their wait was not in vain, for along came Rogers' Airport with another angle to the story, making it a triangle.

This flying cloud manufacturer operated by the airport is used by movie companies shooting storm stuff when there's no storm in sight. With little or no notice the Rogers Flying Cloud can go on high and sketch some very realistic looking clouds into the picture, thus saving the film industry thousands of dollars that it might otherwise cost them to keep a

company on a location until a sure-enough cloud showed up.

Then, and not until then, did the publicity department act, and when it acted it acted decisively. It sent Miss Cloud in a Flying Cloud to visit the cloud machine, and what, it might well be asked, could be sweeter?

Now That Motor Cars Last So Much Longer

—there's more reason than ever for equipping them with truly reliable batteries—also more reason for giving those batteries the care they deserve. Willard 5-Point Service makes batteries last longer and give more uninterrupted service per dollar of battery cost.

Prehistoric

Photos from World Wide Photos "APE MAN" FOUND IN HUNGARY

A veritable "ape man" of prehistoric times is said to have been discovered in the little Hungarian village of Abony recently. The creature is unable to speak a word, and utters weird cries similar to those made by monkeys and gorillas. Its parents, normal Hungarian peasants, had kept their offspring locked in the barn with the cattle for several years. Recently he escaped and was captured by several natives of the village, and is to be examined by prominent scientists. Meanwhile he has been put on exhibition where the curious may view him for a small sum.

Aladdins Proving Big Hit; Will Stay Until End of Week

One of the most entertaining and pleasing offerings ever seen in Torrance is The Aladdins and Their Wonderful Lamp, who have been playing to capacity houses ever since their opening at the Torrance Theatre last Sunday. Manager Slater has extended their booking for the balance of the week and they will terminate their stay here Saturday night. Originally they were booked for three days. On Friday afternoon at 2:30 a special matinee for ladies only will be given, the Aladdins giving the entire show. One of the many features will be what they term their sealed envelope demonstration. The ladies attending this special performance may bring with them envelopes containing blank pieces of paper. They keep in their guarded possessions their envelopes and paper, and later during the performance, when the envelopes are opened by the owners they find the answers to their questions. The Aladdins are the only people doing this remarkable demonstration. Mr. Aladdin having procured it from one of the yogis of India.
