**New Fords Strike Town in Nebraska; They Leak Little**

The following clipping from the Prairie du Chien (Neb.) Courier has appeared: Charles Gregory of Cypress street, Lomita, a hearty laugh and Mr. Gregory passes it on to his friends, via this paper.

Mr. Gregory, who formerly lived in Nebraska is well acquainted with the writer of the item, as well as the couple mentioned.

"Considerable interest was aroused here by the arrival of two new Fords. While not ready for exhibition purposes, the Fords have been observed by several and much approval of their fitness and finish has been voiced. Their bodies are timely lined and graced with pleasing curves. Their color is of a quality that shows richness and well being, and their lines in general are wholly fitting for the work desired of them. Probably not without reason the design follows that of former models, but there are individual differences. They are generally quiet, but there is considerable sound when under heavy stress or exertion. Their speed and durability have not been tested, but their fuel consumption, at least at the present time, is surprisingly low. Methods of caring for the radiator overflow remain the same. While formed on the same general principles there is much difference between the two models received here, which is not surprising when it is considered that one is a boy and the other a girl born to Mr. and Mrs. Louis Ford. The babies have not yet been named, but they and their mother are reported to be doing well.—Prairie du Chien Courier."

There is no better manufacturer in the Worsted Hosiery in the United States than the Winstead Mills. Before this wholesale house could cut the price below a certain low point the mills asked them to sell it all to one party, so it would not upset the market and spoil it for the jobber, who later would carry the line after this house had closed out their stocks. We own several hundred dozen worsted or cashmere hose. Every pair has the manufacturer's name on the foot. You can pay more and get less. 50c to 60c elsewhere.

**ATWATER KENT**

**New Low Prices**  
Result of World Wide Popularity

Five years ago A. Atwater Kent started the world when he brought out a receiver that was as near perfect as human ingenuity and years of research and laboratory experimentation could make it. Later improvements were made which immediately won for it the unchallenged leadership in the radio world.

The popularity of this radio has spread like wildfire. Over a million people are Atwater Kent owners. Additions were made, almost overnight, to the factory until now it has become the largest radio plant in the world.

The result of greater volume and up-to-date manufacturing methods has made possible the recent drastic price reductions. Now hundreds of thousands of people, who have always wanted an Atwater Kent but could not afford it, can form the second million of Atwater Kent owners.

Why wait longer? Order yours today for Christmas delivery.
