

SOUTHERN CALIFORNIA is a leader in light just as she is a leader in everything else she undertakes---City after City is rapidly making her streets clean and beautiful by day and BRIGHT and SAFE after sundown.

In accomplishing this progressive and community building spirit, they have wisely selected approximately

35,000 UNION METAL LIGHTING STANDARDS

ON ACCOUNT OF THEIR

BEAUTY

STRENGTH

LOW COST of INSTALLATION

Low Cost of Maintenance in Replacement Parts to Damaged Standards

The Union Metal Company

Submits to the property owners of the

CITY of TORRANCE

the lowest bid for the complete installation, as follows:

Proposal No. 2, Total Bid \$100,339.19

The Union Metal Company has filed with the City of Torrance a bond in the sum of

\$15,000.00

Guaranteeing to the City, and to the property owners satisfactory performance and service, should our design and bid be adopted for the COMBINATION TROLLEY AND LIGHTING STANDARD, the bond covering particularly the following:

1. The loosening of the nuts which anchor the pole to the foundation.
2. The corrosion of the steel disc anchor rods and nuts or that portion of the pole which is covered up by the base anchoring casting.
3. The corrosion of the shaft either on the outside or inside or between the piles.
4. The failure to withstand the strain as required by the Pacific Electric Company in your specifications, namely, 2000 pounds applied horizontally 32' 6" from the ground and a deflection not to exceed 6.92".
5. The failure of the method of anchoring to adequately carry the strain as submitted to your Engineer, namely, 6900 pounds ultimate strength applied 32' 6" from the ground.
