

BUILD AND LIVE IN TORRANCE

DESIGNED FOR THE SUBURBS

HOUSE AND GARDEN

Due to the growing popularity of gardens, houses designed after the fashion of this one, where the principal parts face to the rear rather than the front are increasing in number. The living room in this residence, measuring 17 feet by 25 feet, is house-depth and has long French windows on both street and garden faces. Outside this room, and between it and the garden, is a broad flagstone-paved porch which is the real summer living room. Also facing on the garden and opening to the porch is the dining room which is in a sort of "L", exposed on three sides.

The first floor, in addition to living and dining rooms, houses a well laid out kitchen, a capacious butler's pantry between kitchen and dining room, and a garage on the opposite side of the house, covered by a lean-to-roof. Rather than detracting from the appearance of the house, as so many attached garages do, this one decidedly adds to the attractiveness of the exterior composition.

On the second floor, which is reached by a stairway from the entrance hall, are four bedrooms, a sleeping porch and two baths. The sleeping porch is connected with the master's bedroom which measures 13 by 17 feet and has a fireplace. One

bath is so located that it may either be connected, en suite with the master's room or it may be used by occupants of other rooms as well.

The exterior walls of this house are covered with cream colored stucco affixed to metal lath. The roofs are of wood shingles. An interesting feature of the exterior is the manner in which the roof above the garage is cut into to allow side windows for master's bedroom and sleeping porch.

H. Roy Kelley was the architect of the residence.

Banquet Marks 10th Anniversary of Co. Council

Delegations of local American Legion members were present at the annual banquet and installation of newly-elected officers of the Legion's County Council on Friday evening, November 2 at Patriotic Hall, 1816 Figueroa street, Los Angeles.

The banquet, marking the tenth anniversary of the Council will start at 6:30 p. m. Among the seven hundred reservations expected will be several from state headquarters at San Francisco.

Immediately following the banquet the guests will assemble in the main auditorium of the building and the installation ceremonies will be staged. After this has been completed the remainder of the evening will be spent in dancing and card parties in the clubrooms on the 8th floor of the building.

The past year of the American Legion Los Angeles County Council has been marked with unusual progress according to a report being prepared by Chester J. Turner, retiring commander. Many civic projects have been instituted throughout the county, membership in the county Legion posts is the greatest in eight years and in other ways the council has had its most successful year.

Noted Visitors Will Attend L.A. Meeting Friday

South Bay women are in receipt of an invitation to attend a conference on the signing of the Kellogg-Briand treaties for renunciation of war, signed at Paris August 27, which will be held under the sponsorship of the Southern California committee on the cause and cure of war, Friday morning, November 2, at the Friday morning clubhouse 440 South Figueroa street, Los Angeles.

Morning program, 10:30 speakers—Paul Bergford, Ph. D., Mrs. William Palmer Lucas.

Academic luncheon, 12:15—Mrs. Susan B. Dorsey presiding. Speakers, residents of colleges and universities in Southern California: Hon. Chester H. Rowell, regent.

Dinner, 6:15—Speakers Dr. Blaisdel of International House at Berkeley, and others; Pomona Glee club, flame ceremony; guests, representatives of the original fifteen signatory nations, fourteen British journalists traveling as guests of the Carnegie endowment for international peace.

Ever Try to Wreck Ford Radiators?

In the Highland Park plant of the Ford Motor Company at Detroit, there is a machine which tries with all the efficient floundering of an engine of destruction to shake the life out of a Ford automobile radiator in the shortest possible time.

Ten hours is the time allotted to this machine, known as an "agitator" to do all within its power to ruin a water-filled Ford radiator. At the end of that period the much abused radiator is taken off the machine and examined by experts for any signs of damage and a brand new Ford radiator, also filled with water, is put on for another ten hours of torment.

This agitator device is part of the testing equipment for radiators that are being built for the new Model "A" Ford car. When you watch it jiggling and jolting and shaking the gurgling radiator, you have a feeling that no automobile driver could drive a car over roads and at a speed which would give it such a severe shaking up and down, not on to his wheel and his seat. Then the factory foreman tells you that within that period of ten hours this agitator gives the new radiator more and severe jars and jolts than the average Ford car will get in its whole lifetime of service.

And this tells you also that the great majority of radiators tested on this agitator come through the ordeal without a sign of injury. Those that spring even the smallest leaks are rare indeed.

Friends Welcome Pastor and Wife at Reception

The many friends of Reverend and Mrs. R. A. Young gathered at the parlors of the Methodist church Thursday evening, October 18 to welcome them back to the pastorate for another year.

Church parlors were effectively decorated with numerous lamps and baskets of autumn flowers.

Edward Clarkson presided as chairman of the evening. Welcoming talks were given by Rev. G. G. Schmidt, who represented the ministers of Torrance; Rev. Ben Linsgenfeller, representing the city of Torrance; Rev. C. E. Hodrick, of the Baptist church; Mrs. O. E. Hall of the Ladies' Aid, and J. B. Edwards of the Methodist church.

Response was made by Reverend and Mrs. Young and Rev. Claude Young of Pasadena.

Following this was a program, for which Mrs. A. W. Johnson sang two vocal numbers, Ella May Ott gave two recitations and Loma Kizer a piano solo.

The surprise of the evening, which touched the amusing note of the evening was the so-called "Harmony Quartette" which lacked nothing but harmony. Members of this were B. A. Hoare, Hugh Henry, O. E. Hall and G. L. Morris. Lovely refreshments were served.

Edison Company Furnishes Relief to Agriculturists by Lowering Power Rates

A new rate schedule applicable to agricultural consumers has been announced by the Southern California Edison Company, to become effective for the agricultural season of 1929, according to the announcement today of C. W. Kolner, local district manager for the company. Agricultural power users will benefit by a saving in excess of \$300,000 during the first year the new rates are operative.

"This new schedule," said Mr. Kolner, "is a two part type which the Edison company has worked out in conjunction with California Farm Bureau representatives.

"An annual service charge based on the rated horsepower of the installation will apply in all cases. This charge will be collected during the six months period from May to October. The charge for energy will be made each month as power is used.

"The new rate schedule provides for a gradual reduction in energy charges based on the use of the installation. In an instance where a fifty horsepower motor is in use, the rate per kilowatt hour for consumption per horsepower during the year would be 12 cents for the first 1000 kilowatt hours. The rate for the second 1000 kilowatt hours would be 9 cents and for all over 2000 kilowatt hours 8 cents.

The following schedule gives the annual service charge per horsepower:

Size of Installation	Annual Charge
2 to 4 horsepower	\$6.50
5 to 14 horsepower	5.50
15 to 49 horsepower	5.00
50 to 99 horsepower	4.50

100 horsepower and over..... 4.00
The energy charge in addition to the service charge for installations of the varying horsepower as established in the new schedule fixes a rate per kilowatt hour for consumption per horsepower per year as follows:

1st 1000 kilowatt hours; the second column, the 2nd 1000 kilowatt hours; and the third column all over 2000 kilowatt hours.	1.5c	1.2c	.8c
	1.4c	1.1c	.8c
	1.25c	1.0c	.8c
	1.2c	.9c	.8c
	1.15	.8c	

Fine Music Program Promised Wednesday

Richard Bartholomew of Los Angeles will give an hour of music at the Women's Club Wednesday afternoon. All members of the club are urged to be present and enjoy this rare treat.

All reservations for the luncheon must be made with Mrs. W. H. Gilbert by six o'clock, Monday, Nov. 5 as no reservations can be made after that time.

Mr. and Mrs. J. S. Stevens of Lincoln, Nebraska, visited with Mr. and Mrs. Howard Smith Saturday and Sunday. The party drove to La Jolla and San Diego to visit other friends.

Dr. and Mrs. W. J. Neelands, Miss Joan Neelands and William Gray of Gardena spent the week end at Big Bear.

Mr. and Mrs. George Chaney and niece, Miss Eileen, and Bonnie Jean Hodgett and Thelma Smallback, attended the Halloween carnival given by the Women's Club of Davidson City Monday night. Miss Bonnie Jean Hodgett was elected queen of the carnival.

The FAMOUS MAJESTIC DYNAMIC POWER SPEAKER

THE HIGHBOY
Beautiful cabinet with doors of matched burled walnut. Surrounds speaker with full enclosure case. Self contained Majestic Power Speaker \$187.50 Less taxes

The Secret of Majestic's Tone Superiority

THE lifelike tone of Majestic All Electric Radio Receivers has been a source of wonder to all who have heard this sensational radio equipment. Musicians throughout the country have, after hearing Majestic, acclaimed the Dynamic Power Speaker, which is self-contained in all Majestic models, as the nearest approach to the human voice of any device ever perfected. This amazing reproduction unit is made under license granted by the Radio Corporation of America which permits the manufacturers of Majestic radio to use RCA patented features. It is patterned after the famous Radiola 104 Power Speaker which sells at retail for more than \$250 and is probably the most efficient radio reproducer ever built. Only with Majestic radio can you enjoy the surprising fidelity of tone made possible by the Majestic Dynamic Power Speaker.

The fact that the Majestic Dynamic Power Speaker is practically a replica of the famous and expensive Radiola 104 Power Reproducer is indicative of the quality that is built-in to Majestic Electric Radio Receivers. The beautiful Majestic cabinets are built by master workers in fine woods. The efficient seven tube Majestic receiving circuit embodies all that is latest and best in radio receivers. The sturdy Majestic Power Unit, acknowledged even by manufacturers of competitive equipment to be the most efficient ever built, insures positive and trouble free light socket operation. The most surprising Majestic feature, however, is the amazingly low price made possible by Majestic's tremendous volume production of 3250 radios each day. Majestic receivers actually sell for about half the cost of radio apparatus with like features and of comparative quality.
