

# Of INTEREST TO MOTORISTS

## THAT CAR OF YOURS

All cars, regardless of model or type, should be equipped with a good grade of rear-sight mirror. This accessory is necessary for driving security.

Avoid approaching an intersection, whether or not you have to stop, at a speed greater than 20 miles an hour. Coming up slowly assures safety if one has to stop, saves the life of the brake lining, and gives longer wear to the tires and car.

Running board step plates should be installed on a new car for they will not only save wear of the runningboard cover itself, but will guard against marring the finish on the runningboard apron and add to the appearance of the machine.

The front wheel bearings of your car should be inspected frequently for wear and out of adjustment, also for lack of lubrication, for it is surprising how they wear and become loose, to permit a constant pounding on the ball bearings and ultimate destruction of the bearing.

The windshield should be kept clean at all times for a dirty windshield sometimes causes the driver to misjudge distance of pedestrians and other objects. This causes accidents, and often serious ones. It is surprising when the glass is only covered with dust, how driving against the sun effects the vision. Also this dust in turn will cause the windshield wiper to scratch the glass when working during fogs.

## Ford Completes Concrete Runway

(Continued from Page 1) highway was put down. And since that time the county has kept well to the fore in highway development. Henry Ford, who was a member of the Board of county commissioners which built that first hard road, twenty years ago, might have been expected to be the first to use concrete in serving the highways of the air. We have here the proof that he has lived up to our expectations.

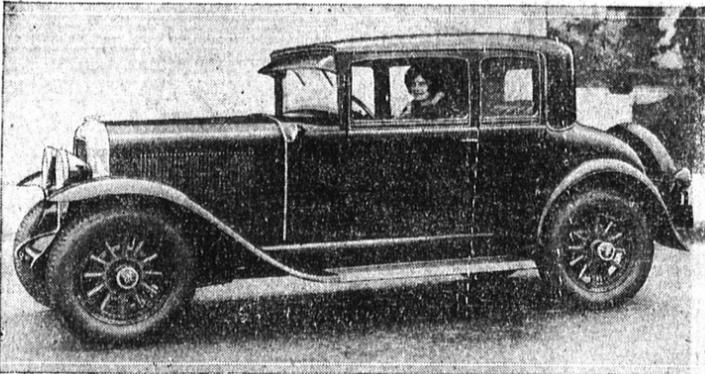

One runway already is in use at Ford's model airport; another is to be completed this year.

"This port is pioneering the way," said Mr. Boyer. "Others will follow. On the west coast a new Los Angeles airport is to be opened next week. There, too, thanks to Ford's leadership, we find extensive concrete runways."

## Newcomer Is Welcomed to Famous Line

The newest—and nineteenth—member of the elaborate 1929 Silver Anniversary Buick array, presented to the Pacific Coast public for the first time at the opening of the present year. The new model is a four-passenger coupe, built on the 121-inch wheelbase and powered with the 90.5 horsepower Buick motor.

## They Hang Drunk Drivers in Australia

Best Way to Cure Evil Says Visitor Here

How drunken drivers are handled in a country where liquor may be obtained by anybody any time is

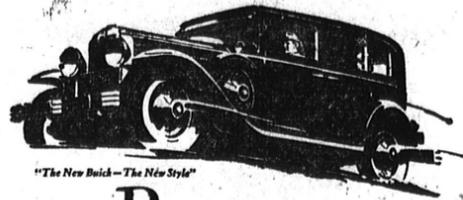

told by Charles W. Lloyd of Adelaide, Australia, who is in this country studying highway and traffic conditions. In an interview of his reaching the Automobile Club of Southern California it is stated that although Australia has no prohibition statute it has avoided the drunken driver problem by making the penalties so strict that motorists fear to incur them.

A motorist is liable to be hanged if he kills a person while under the influence of liquor, Lloyd said. Or if the driver is convicted only of manslaughter in such cases he is

subject to eight to ten years' imprisonment. Knocking another person unconscious in traffic accidents is punishable by two to four years' imprisonment if the driver is intoxicated, while the lowest penalty for drunken driving is a fine of \$125, six months' imprisonment and loss of license.

Chuckle a bit and forget your worry. Read the Comics on the back page and the first page of the second sec-
