

The Whole Family Will Enjoy The Meats

From Rock Bottom Market Supreme Market

L. OTT HENRY GRUBB

TENDER savory roasts... succulent steaks... meat is usually the main part of the day's chief meal...

OBITUARY

Lillie Eva Newton, was born Nov. 15th, 1903 in Kansas City, Mo., to Thomas and Nancy Newton.

On June 30th, 1926, she was married to Clarence W. Woodward, of Torrance, Calif., and from this union there came a son, born Feb. 28th, 1929.

At the age of eight, Eva was baptized into the Reorganized Church of Jesus Christ, of Latter Day Saints, and she has always had a perfect faith in God, and a hope of a fuller, and a more abundant life.

Her passing was peaceful and sweet and she realized the promise made by our Heavenly Father, "Blessed are they who die in the Lord, for death shall be sweet unto them."

Besides those of her family, she leaves to mourn a host of friends.

TORRANCE NOTES

Forrest McKinley, who has been on the lumber schooner "Missouri" at Aberdeen, Washington, arrived home yesterday for a visit.

Miss Mary E. Stone of Chicago, arrived Tuesday for a visit with her brother and his wife, Mr. and Mrs. Joe Stone.

Give Credits for U.S.C. Radio Classes

University credits by radio! This is the newest educational phase made possible through the development of radio, announcement being made today that the University of Southern California will inaugurate two distinctive courses over the air March 18.

Inauguration of the epochal university courses has been assured through financial contributions by Ray Thomas, Atwater Kent radio distributor, and the MacMillan Petroleum Products company.

One course, the announcement states, will embrace radio lectures for which no credits are to be given. The other, however, offers opportunity for the pursuit of credits which will be accepted by the university in partial fulfillment of the requirements for certificates and degrees.

The committee heading the radio courses comprises President R. B. von KleinSmid, Warren B. Bovard, Emery E. Olson and Frank C. Toulon.

Lectures by staff members will cover in business law, archaeology, biblical literature, comparative literature, economics, education, English literature, foreign trade, history, international relations, philosophy, public speaking, psychology, Slavic studies and sociology.

The tuition course, necessitates regular enrollment. University prerequisites must be observed, it is stated. Course outlines with reading lists and problems will be supplied by the instructors, while text-books must be secured and studied. Papers will be read by instructors and returned to students with notations and suggestions, while supervised examinations will be announced as to time and place.

The university announces that the time span of these courses will correspond to the university quarter, the first quarter beginning March 18.

According to the outlined program, twelve half-hour lectures are to be given, on each week over KEJK.

In each of these lectures frequent references will be made to mimeographed outlines which will be in the hands of all who have enrolled for that course.

The examinations will be conducted under the adequate supervision and direction of a responsible educator, it is asserted. Items covered in the examination will include topics selected from the content of the radio lectures, of the course outlines, of the assigned reading materials and of the conference period.

Ray Thomas, in a statement today, frankly admits his enthusiasm for the radio course to be launched this month. In a bulletin to all Southern California Atwater Kent dealers sent out this week he expresses the opinion that this is the beginning of a wonderful expansion in the field of education and in the radio industry.

"I am very much interested in this movement personally," he writes his dealers, "for it opens new avenues of education by permitting many to take college courses who would find it impossible otherwise."

Christian Science Lecture, March 31 at Women's Club

The Christian Science Society of Torrance announces a free lecture on Christian Science by Dr. Hedrick Jan de Lange of The Hague, Holland, member of the board of lecturership of the Mother Church, The First Church of Christ Scientist, in Boston, Mass., to be delivered in the Women's Clubhouse, Sunday, March 31 at 8 o'clock.

The public is cordially invited to attend.

The following is taken from the Christian Science Monitor, Dec. 29: "Dr. de Lange is a native of Holland and received his education in the schools of that country. He obtained the degree of Doctor of Law in Leyden university. He speaks English, French and German, in addition to his native tongue."

In 1911 Dr. de Lange became interested in Christian Science and took up its study, becoming a member of the Christian Science Society, Amsterdam, Holland. The following year where he served as first reader and in other capacities until 1927, Dr. de Lange became a member of the Mother Church, The First Church of Christ Scientist, in Boston, Mass. in 1914, and he is now a member of First Church of Christ Scientist, The Hague.

He has been engaged in the practice of Christian Science for a number of years and has been correspondent of the Christian Science Monitor in Holland, for more than six years.

TORRANCE NOTES

Mrs. E. B. Dilley spent last week in Santa Paula, the guest of her sister-in-law, Mrs. S. S. Williams. Mrs. Williams returned home with them, and will be a guest at the Dilley home for two weeks.

Mr. and Mrs. William Gascoigne and Maxine, with a niece, Mrs. Hodgett, who is visiting here from Washington, drove to Santa Barbara Sunday to visit Mrs. Gascoigne's sister.

Mr. Roy and Dr. Lida King and daughter Barbara of Los Angeles, were guests of Mr. and Mrs. O. T. Chambers last Thursday. Dr. King and Dr. Chambers were classmates at chiropractic school.

Giant Wistaria at Sierra Madre Surrounds Whole House

With its purple wistaria vine that entirely encircles a residence now coming into bloom, Sierra Madre announces its annual Wistaria Fete for the period from March 23 to April 14, it is reported to the touring bureau of the Automobile Club of Southern California.

This unique, gigantic marvel in Sierra Madre, which nestles below Mount Wilson five miles east of Pasadena, attracts thousands of visitors every year. The vine is on the residence of H. T. Fennel, 201 Carter Avenue, and was planted in 1893.

Careful nurturing has developed it so that it now extends about 350 feet in length, and encircles the house on the east, and west sides, meeting at the rear and continuing above a large pergola.

THAT CAR OF YOURS

Check up your tires. Badly worn tires might well be laid away for use in the dryer season and substituted with tires upon which there is plenty of tread to provide traction.

When the engine has been completely overhauled or is new be careful to use only a very good grade of oil and plenty of it, and of course, drive with discretion at no greater speed than 20 to 25 miles an hour.

When brakes begin to squeak, have the serviceman check up to see whether: (1) the bands or shoes are properly adjusted to the drum; (2) rivet heads are dragging on the drum; (3) the drum is scored or out of round; (4) grit or other foreign matter is imbedded in the lining; (5) anchor bolts or brake rods are loose; (6) any parts are rusted.

What is the lowest part of your car? Check up on this and then make a note of it for future reference. The next time you strike a rutted road or bad detour the lowest part of your car is apt to take some pounding from the road, and you should have this part checked up on at the first garage beyond the detour or bad road. A quick check-up may save repair bills, a breakdown or accident later on.

Owners sometimes wonder why the motor continues to heat up when they know that the valves have been ground, the fan belt adjusted, the radiator and water jackets cleaned, and the radiator filled with fresh water. An inspection of the radiator hose connecting the water pump to the radiator, and the radiator to the water jacket will often reveal that the inside of the hose has swelled, practically closing up the path of the water flow. The only remedy is to replace with new hose.
