Insurance Costs Less!

Insurance premiums are about the only items of expense that are lower now than they were ten or fifteen years ago. Food, clothing, building, —practically all things cost more.

The great fire insurance companies, by their inspections and engineering service, have reduced fire hazards and have returned the savings to the public in the form of lower premiums instead of paying them to stockholders.

Costing as little as it does, insurance should be carried by everyone who owns property or an automobile. If you think you need more insurance, see me. I will be glad to advise you.
