Epworth League, 6:30 in the league room. Harry Phillips, president.
Prayer meeting and Bible hour, Wednesday night, 7:30.

CHURCHES OF CHRIST, SCIENTIST

The question "Are Sin, Disease, and Death Real?" was the subject of the Lesson-Sermon, Sunday, October 13, in all Christian Science Churches, branches of The Mother Church, The First Church of Christ, Scientist, in Boston, Mass.

One of the Bible texts in the Lesson-Sermon recited a case of healing by the Master, as related by Luke: "And it came to pass, as he went into the house of one of the chief Pharisees to eat bread on the sabbath day, that they watched him. And behold, there was a certain man before him which had the dropsy. And Jesus answering spake unto the lawyers and Pharisees, saying, is it lawful to heal on the sabbath day? And they held their peace. And he took him, and healed him, and let him go."

A citation from "Science and Health with Key to the Scriptures" presented these words of Mary Baker Eddy: "God is the law-maker, but He is not the author of barbarous codes. In finite life and love there is no sickness, sin, nor death, and the Scriptures declare that we live, move, and have our being in the infinite God."

CHRIST EPISCOPAL CHURCH

1488 Engracia avenue.
Rev. Harold H. Kelley, vicar.
Sunday school, 9:30 a. m.
Morning service, 10:30 o'clock. Confirmation Holy Communion at 7:30 a. m.

SCREEN GRID SETS PLEASE SPORT FANS

When the football teams of University of Southern California and Occidental clash at Los Angeles Coliseum next Saturday, a play-by-play description of the game will be broadcast by Los Angeles stations.
Unless there is an electrical storm, owners of radio sets in this district should be able to hear the broadcast plainly. If the reception is poor, the chances are that your receiving set is at fault, according to Mr. Irvin S. Sargeant, of the Torrance Radio Co.
"Before the screen grid tube came into use, the radio listener had to take his chances in listening to the broadcast of a football game," said Mr. Sargeant. "If any trouble developed at the crucial moment, when one team was on the verge of scoring a touchdown, the listener was simply out of luck.
"This year, with the perfection of screen grid radio, an accomplished fact, there is no need to take time out for trouble. The screen grid set has given radio fans a new conception of the delights of perfect broadcast reception.
"The Crosley Radio Corporation has developed a line of screen grid models which will enable sport fans to tune in on football games, boxing bouts and other sporting events under greatly improved conditions. Residents of the rural districts can enjoy the same advantages as city people, for Crosley has produced a screen grid battery receiver that compares favorably with an electric set using screen grid tubes. This receiver uses the famous Crosley dynamo speaker and is so designed that it furnishes more power without causing excessive drain on the storage battery."

Dodge Brothers Six Turned Over Showing Chassis
What may look at first glance to be an ordinary automobile with service to be made in this district, Paul & Murray display window on Cabrillo avenue is really a model exhibit of the 1929 Dodge Brothers Six chassis. The car is turned on its side and shows in a striking manner the many points of Dodge Brothers superiority, according to Len Murray.
Among the features of the Dodge Brothers Six chassis are: (1) Four-wheel weatherproof hydraulic brakes with the internal shoes fully shielded from water, mud and dirt; (2) Eight bearings in rear axle assembly; (3) Seven bearing crankshaft which increases the life of the motor; (4) The body is fastened horizontally and vertically to the frame by 33 bolts; (5) Large oversize tires; (6) Battery is easily accessible for inspection and filling.
In addition to pointing out these advantages in the chassis construction, Paul & Murray salesmen are also enthusiastic about the many improvements in the Dodge Brothers engine and body refinements.
The public is invited to view this spectacular display at the salesrooms, 1420 Cabrillo avenue.

World series talk and bets were quite the thing throughout the shops all last week. Several radio sets were set up throughout the shops and in the office and no one need be without the latest dope on the games. A great many quarters and drinks changed hands during the series among the boys.

Little Billy Maissy, ten year old son of Watchman Maissy, suffered severe burns last Saturday evening by having his clothing catch fire after using soaked with gasoline which he was using to clean bicycle parts.
Jack McEwing started his vacation last Monday. We did not get to find out where he intended spending his time but leave it to Jack to make it worth while.
A. E. Fowler returned Monday from his vacation looking fit for another year's struggle with paint brushes, spray guns and time cards. Most of his vacation was spent at Lake Elstnere among the famous mud-baths and tasty drinking water. He claims that Elstnere's fastidious water is fine compared to Torrance drinking water. No one would argue that statement with him.
Dan Barnard had an experience the other night that has a real moral lesson in it for all home-town people. He went to the big city to buy some prunes that he had seen advertised by one of the big stores for 12c per pound, (they were 20c in Torrance) and on the way there was tempted into the Folies theater. When the show was over Dan's was on other things or was not working at all for he could not find the big store and after a hunt lasting one and a half hours returned to Torrance and bought the prunes from his "neighborhood grocer."

A. W. Tracey, engineer at the Borax plant has moved, with his family, from San Diego to 1632 Cypress.

NEWS AND NONSENSE IN THE P. E. SHOPS
Edited by Carleton B. Bell
That San Bernardino team is certainly hard to satisfy. They have twice beaten our shops team but they just can't realize that it is true. They understood, from something they read in the P. E. Magazine, that we had just about the best team in the world here in Torrance and they evidently want the experience at least once of being beaten by that team. Any way they have again asked the Torrance team to be their guests in San Bernardino and play another ball game and if possible, live up to their reputation as champions. It is not a question of beating a ball team but a question of hitting a pitcher that is bothering the Torrance ball players.

Frank Mayfield again pulls a good publicity stunt. After the last ball game at Compton with the San Bernardino team he was discovered to have several cubes of P. E. lunch room sugar in his pocket. Frank made the discovery himself but explained to everyone that he was innocent of wrong doing, that he did not put that sugar there and that no one should blame him in any way for its being there.
You P. E. shops ex-service men that do not belong to or around Legion affairs had better look out now. We have a real Legion officer among us with all the necessary authority to attend to your cases now. Harry Cull, of the wiring department, was elected sergeant-at-arms of the Torrance Legion Post at their election last week and he plans to make it hot for any of you buddies that are AWOL. He gets well repaid for all his efforts in behalf of the Legion by being allowed to carry the Post colors in the parade at Pasadena New Year's day throughout the entire ten miles of march.
Many of the men are congratulating Jake Groskopf on his start toward a goal he has had in mind for some time. Last Wednesday he took the first step toward becoming a member of the Masonic order and several fellow employees were present to cheer him on his way. He is now studying hard and it should not be long before they get another chance at him.

Charming Combination of French and English

SIX ROOMS AND SLEEPING PORCH
Home builders who want as much as possible for their money will find the attractive house pictured above an excellent example to follow.
Erected at La Grange, Illinois, this "homey" dwelling combines both French and English features with sturdy construction that will endure throughout the years.
Concrete masonry was chosen for the outer wall construction and covered with a pleasing texture of portland cement stucco. Much care and attention was given to the finish of the stucco, because it is through this medium that the house achieves an individuality rarely found.
In the interior, the living room commands attention because of its size, 13 1/2 feet by 25 feet. It extends entirely across one end of the first floor. Of easy access in the rear are found the dining room, breakfast nook and kitchen. The latter, with its built-in conveniences that save so many steps during the busy day, will delight any housekeeper. To the front of the first floor is a large bedroom adjoined by a bath and two roomy closets.
Two additional bedrooms, a sleeping porch and another bath are located on the second floor. These, with six convenient closets, complete a room arrangement that is ideal from any point of view.
Both inside and outside, this compact, and yet roomy, house possesses an individuality that makes it outstanding wherever built.
