Church night in a service of song, prayer and Bible study.

Fire Crackers, enough for every one. First 3 days of July. S. S. WORRELL, The Hardware Man.

Gas Company to Spend Money in Developments

J. F. Murray, Division Manager, Reveals Plans for Extension and Betterment of Service

The Southern California Gas Company, according to J. F. Murray, division manager, has increased the amount set aside for extensions and betterments during 1930 to a total of five and a half million dollars. The additional construction program will materially increase the gas transmission facilities from the fields in the San Joaquin Valley to the Los Angeles basin area, and will further insure the supply of natural gas to homes and industries. Seven-and-a-half miles of twenty-two inch pipe line will be laid from the terminus of twenty-inch Kettleman-Hills line at Buena Vista Junction. This will carry gas to their Compressor Station 40, which is having its capacity increased so that it can handle seventy-five million cubic feet of gas daily. Forty miles of twenty-two inch line will also be laid parallel to the present twelve-inch line over the Ridge Route, and seventeen miles of the same sized line will be constructed from Newhall to Ventura boulevard near Woodley avenue, passing to the west of the San Fernando reservoir. The twenty-six-inch line will be run through Sepulveda canyon to Pico boulevard. In addition to the increase in capacity of Compressor Station 40, a new terminal station is to be built at Newhall, with modern cottages for the operating employees and their families, and a building to be used as an office. Another terminal station is to be erected at Sepulveda and Pico boulevard.

In addition to these lines in the San Joaquin Valley and in the neighborhood of Los Angeles, five miles of sixteen-inch pipe line will be constructed from the Southern California Gas Company's present compressor station at Ventura, through Hall Canyon, to Mills Road Junction. Preliminary plans have been completed, the pipe has been ordered, and actual construction is expected to begin during July. It is believed that the major portion of this work will be finished, and that the lines will be placed in operation soon after December first, this year.

Car Overtakes on Hill Near Glider Field

A car with six passengers hurtled on the Palos Verdes hills late Wednesday when R. L. Stevens, 115 South Berendo, Los Angeles, driver, lost control of the car. The accident occurred on a hill near the glider field.
It is asserted that Stevens was pinned beneath the car, but no information could be obtained as to the extent of his injuries.
Passengers in the car were G. A. Pearson, 517 Adelyn Drive, San Gabriel; Jean Moore, 115 So. Berendo, Los Angeles; Constance Irwin Harold White and Marie Holly, all of 235 So. Berendo, Los Angeles.

BUILDING PERMITS
J. C. Smith took out a permit for a \$1500 refreshment stand at 1408 Cabrillo.
Y. Yamaguchi, 3850 Alhambra, a \$250 bunkhouse.
Edward L. Guth took out a permit for a \$7500 two-story hotel building and \$500 garage building at 1913 Cabrillo avenue.

EYE-GLASSES WITH ELECTRIC LIGHTS
BERLIN, Germany.—One of the newest German inventions is the Bacchus-Eyeglass which is fitted with an electric bulb on each end of the frame. A cord joins the frame of the glasses with a battery which may be carried in one's pocket. It is expected to prove a decided aid to night workers. Photo shows a man reading a paper with the aid of the "electric glasses."

Zonite
For Cuts and Wounds
Prevent infection! Treat every cut, wound or scorch with this powerful non-poisonous antiseptic. Zonite actually kills germs. Helps to heal, too.

Early American In Brick

THE CONCORD
By DUNCAN HUNTER, Architect
New York
The early American houses of brick were built by shrewd pioneers who understood the advantages of permanent construction. While it is true that in the very earliest of American houses wood was used by reason of its availability and abundance while brick kilns were not yet in operation and even to a later date brick was somewhat scarce, it is relatively so in proportion to wood. Stone was quarried at an early date and in some sections of the country stone houses were prevalent—such as in New Jersey and Pennsylvania, but brick was an old favorite. There stands today in Fairmount Park, Philadelphia, the William Penn house, America's earliest, built of bricks brought over from England. Many of the early Southern houses were also constructed of imported brick. Brick always has been a favorite construction material, from the vast Roman aqueducts to the modern home.

In Colonial times the neat red brick house with white or light colored trim always gave one the impression that a person of refinement and taste lived there and at the same time it carried the conviction that the owner knew values and appreciated sound permanent construction.

The Concord as shown herewith presents an early American type in brick—with thorough going, practical and economical plans—a decidedly modern set-up. It shows:
Basement: Recreation room, laundry, heater space, etc.
First floor: Entrance vestibule with coat closet, living room, sun room, dining room, kitchen and a one-car motor room.
Second floor: Three bed rooms, a bath, a study or maid's room and closets.
Celling heights: Basement, seven feet; first floor, eight feet; second floor, eight feet.
Exposure: The plans as shown are for a lot facing south or west. For a lot facing north or east the plans should be reversed.
Lot size: House frontage, 26 feet; side clearance, left 10 feet, right 4 feet; lot frontage, minimum, 40 feet.
Construction: Exterior walls, brick; roof, shingles; foundation, concrete; windows, double hung with shutters; doors, wood, to special details.
Interiors: Floors, wood; walls, plaster; ceilings, plaster; kitchen, composition tile; bath room, tile; steam heat, gas and electric wiring.
Cubiture: 25,000 cubic feet. Complete working plans and specifications of this house are available for a nominal sum. Address the Building Editor and refer to House H-132.

PLUMBING SERVICE FOR 13 YEARS
... in Torrance. That alone speaks well of a local firm. It has been and will continue to be our aim to ALWAYS give the BEST SERVICE at a price that is consistent with good business.
