# FORD SMOOTHNESS

The new Ford has more than twenty ball and roller bearings

EVIDENCE of the high quality built into the new Ford is the extensive use of ball and roller bearings. There are more than twenty in all — an unusually large number. Each bearing is adequate in size and carefully selected for the work it has to do.

At some points in the Ford chassis you will find ball bearings. At others, roller bearings are used regardless of their higher cost. The deciding factor is the performance of the car.

The extensive use of ball and roller bearings in the new Ford insures smoother operation, saves gasoline, increases speed and power, gives quicker pick-up, decreases noise, and gives greater reliability and longer life to vital moving parts.

Other outstanding features that make the new Ford a value far above the price are the Triplex shatter-proof glass windshield, silent, fully enclosed four-wheel brakes, four Houdaille double-acting hydraulic shock absorbers, aluminum pistons, chrome silicon alloy valves, three-quarter floating rear axle, Rustless Steel, the extensive use of fine steel forgings, and unusual accuracy in manufacturing.

# PIGGY WIGGLY All Over the World

## Advertised Brands

The Piggy Wiggly organization of Southern California believes thoroughly in the motto of doing one job and doing it well. Our one thought in business is selling foods—good foods. We choose the lines and brands of manufacturers and canners who bear the highest reputation. We believe that when a producer of foods thinks enough of his merchandise to tell you of its quality and merits through high class national and local publications, he is going to be very careful to protect his interests by putting quality in the package. Therefore, our policy is to let the manufacturer worry about the sale of his products. We will put it on the shelf, and you will determine by your selection whether or not we reappear.

This week we are featuring Del Monte and other nationally advertised brands at exceptionally attractive prices.
