"I'll see you at dinner time," says she to her Clock Controlled Natural Gas Range

No need for her to tend the cooking. The clock will turn on the gas, and turn it off, according to her direction. The automatic oven heat regulator will govern oven temperature. Food will cook perfectly, from start to finish, while she is miles away. And because of oven insulation and new type burners, natural gas is more efficient than before. Cooking costs as little as a quarter of a cent a person a meal. See the new ranges in the display of your dealer or gas company, and look for the Blue Star Seal of the American Gas Association Testing Laboratory.
