Whittier Woman Leaves Property to Waleria Kin

Son and Daughter Here Are Bequeathed Valuable Estate

The Whittier properties of the late Amy C. Waer, a widow who died last January 4 at Whittier, are bequeathed to her son, Walter Cates of Whittier and a daughter, Mrs. Amy Huffine, and another son and daughter in Waleria, according to the terms of the will on file today in Los Angeles probate court.

The son in Whittier resides at 128 N. Milton, while the children in Waleria, George Cates and Mrs. Minerva Pedersen, reside at 1431 Ward street and 24134 Ward street, respectively, according to the petition for probate of the will.

Walter Cates and his sister, Mrs. Amy Huffine, are bequeathed the property at 227 South Newlin street, while the house at 1431 Ward street, the Canobie street are to become the property of the son and daughter residing in Waleria. Value of the estate is not definitely known, but will not exceed \$10,000, it is stated.

Mrs. Waer also bequeathed \$500 to her son, William Cates, of Moulton, Nebraska, and specified that payment of the amount was to be a charge against the real estate at the Newlin street address in Whittier.

Keeping Up With Torrance High

JAYNE TRALLER, Editor.

All of the honors bestowed upon the Madrigals this season have been climaxed by an invitation to sing at the Eagle Rock choir festival on January 19. Only four high schools in the entire city system are invited to perform on this occasion. The choir consists of those from Manual Arts, Beverly Hills, Eagle Rock and Torrance high schools, besides the Los Angeles Junior College choir.

Shizuko Kazama was hostess for the last luncheon given Tuesday, January 16, by the social arts class. Haruko Minami was assistant hostess and George Kubo, host. Guests were Miss Collier, Mr. Mowry and Gale Travers.

Members of the Future Farmers Club brought their lunches to the last meeting, January 4. Dr. R. F. Bolenbaker, obtained through the Mayfair Creamery, spoke on dairy products.

As soon as there is a stage and curtain in the tent that is being used as a temporary auditorium and cafeteria, Mrs. Engle's dramatic class will give three plays.

"Romance Is a Racket," "Thank You, Doctor" and "Rosalie" will be presented.

At the last meeting of the Sketch Club the members attempted to draw from life. Georgiana Humer, dressed in yellow and black, posed for them. Before the year is over the club hopes to be working in oil paints.

Repairs are being made on the damaged auditorium. It is hoped that the work will be completed in time for senior graduation.

"Around the World With Souvenir Hunters" is the theme of the display window in the main hall this week. Pottery, dolls, fans and unusual articles from every part of the world are in the show case. An incense burner from India, a Japanese jirrickshaw, tiny Mexican jars and bowls, Chinese sippers, Spanish dolls, Hopi Indian pottery, a quaint German Italian pottery, a quaint German stein and a tiny but with miniature figures from the South Sea Islands are some of the interesting things on display.

Mrs. Adelaide B. Hanson, a cousin of one of the club sponsors, Miss Eva Jones, was the speaker at the World Friendship meeting held January 11. She gave a very interesting talk on "Schools Around the World," relating what she had learned about schools on her travels around the world. Refreshments were served after the meeting.

Two Tons of Utah Roses At Pasadena

SALT LAKE CITY, Utah. (U.P.)—The Rose Bowl flower show at Pasadena, California, used two tons of Utah roses for their last exhibit, according to G. J. Barton, president of Utah State Florists.

For several seasons past, Utah roses have been shipped to California to decorate the officials' float in the Tournament of Roses parade. The flowers were valued at more than \$1000. A similar amount of flowers will be sent to Portland, Oregon, for the annual show there, Barton said.

SEEK ARCHERS. TUCSON, Ariz. (U.P.)—Efforts are being made to bring the 1935 national archery tournament to Prescott, Arizona, it was announced here by A. J. Cosner. The 1934 contest will be in Connecticut.

Congressman Favors Government Subsistence Tract In Torrance

In a recent letter to Mayor C. Earl Conner, on the subject of Subsistence Homesteads as promoted by the federal government as a part of its recovery plan, Congressman Charles J. Colden has expressed himself as being greatly interested in having one of these projects in the vicinity of Torrance.

Radio Stations to Forewarn of Flood Dangers

Two Short Wave Stations to Be Established In Canyons

In the future it will be possible to forewarn all people concerned before flood waters start their rush from canyons to the sea. Rapid communication as to the condition of stream levels in the upper canyons is to be made possible immediately by the installation of three short-wave broadcasting stations by the Los Angeles county flood control district. County authorities have been given permission by Herbert Petty, secretary of the federal commission, to operate such stations.

Two of the stations will be in the nature of look-out posts in the canyons while the third will be situated in the Civic Center Building in the offices of the flood control department. One of the mountain stations will be located in the San Gabriel canyon watershed and the other will be in the upper Tujunga Canyon. Under this system communication will not be broken if telephone lines are washed out.

These stations are to be used only in case of flood emergency, according to Flood Control Engineer E. C. Eaton. They will make a repetition of the Montrose disaster unlikely.

The call letters of the stations are KHX, KHV and KHY. The wave lengths are not being made public.

OREGON SEES MIRAGE

PORT OXFORD, Ore. (U.P.)—A mirage observed on the Pacific ocean here enabled residents to see a beautiful view of Cape Mendocino, California, 200 miles south. The cape was reflected on the sky. It cannot be seen here usually.

Parole Denial Taken With Smile

Warren K. Billings, convicted with Tom Moomney of participation in the 1916 San Francisco Preparedness Day bombing, pictured at Folsom prison Saturday when his application for parole was turned down by the parole board. Told of the board's denial, Billings said he "did not expect any other decision," and blamed Gov. Rolph.

Bridge Work on New Sector

The huge electric dredger pictured above starts work on the \$269,000 contract to build four miles of rock and sand fill on the Oakland side of the San Francisco-Oakland bay bridge, great engineering project, on which work is proceeding rapidly. Over 2000 men are now employed on the entire project.

Big Bargains In Used Furniture

Hints For The Amateur Gardener

By Harry Nelson

Through an arrangement with Harry Nelson, Los Angeles gardening expert, the Herald will offer each week a timely article on the proper planting and cultivation of agreeable flowers. Mr. Nelson will answer all questions relating to gardening, either through this column or by direct communication. Persons who wish prompt and personal answers to their questions must enclose a stamped self-addressed envelope with their communication to insure a reply. Questions may be sent to this office to be forwarded to Mr. Nelson.

This will be a continuation of last week's ideas on house plants. Some of you may have some plants of Coleus. It is a tender plant often confused with Begonias. At any rate it will grow in masses of white, wool-like stuff in the crevices where the leaves join the stem. If this happens, take a fine brush or sharp pencil and pick them off. Do not forget that by keeping your plants growing steadily and thickly you make them more resistant to disease. Another tip on Coleus—do not let them bloom. The bloom is worthless and it takes color from the leaves. Coleus, as well as the fibrous rooted Begonias, will make roots easily in water, sometimes better than they will in sand. If you have plants of the Impatiens, you will find that they, too, will grow in water. It should be borne in mind that the cuttings to be rooted this way should be about eight inches long. Take off the older leaves and leave the smaller ones near the tip. If there are any buds at the leaf terminals they should be left. If the leaves are too large, cut half of them away.

Repotting House Plants

House plants should not be put into pots too big for them. If you find it necessary to re-pot, use the next size larger. When you think it is time for a larger pot to be used, tap the plant out and look at the root system showing. If it covers the ball of earth quite thickly it is time for a new pot. Loosen up the ball of earth and plant in a good loamy soil, about a third part moss, a small amount of sand and a bit better than a third loamy soil. If you are re-potting ferns, you might use leaf mold instead of peat moss. Immediately after this operation, put the pot in a basin of water and allow it to stand for two or three hours to take up plenty of moisture. If you are using a new pot, let it soak in water a few hours before using so the pores will be filled up.

By spraying water on the plant itself every few weeks you will be aiding in keeping the insects down.

In case you get an infestation of aphids, a spraying of water will wash them off. It might seem as though they are back in a few days but do not forget that they hatch from the eggs in a very short time, so if you catch them when they are very young, two washings will generally be sufficient.

Courting Disaster

Do not allow the potted plants to stand in a basin of water day after day. The water will become stagnant and air will be unable to get to the roots. You will only be courting disaster by doing so.

To sum it all up, your plant seems to be turning yellow or brown, add a small amount of fertilizer. If it responds by turning green again, start using a small amount every three or four weeks but be sure the amount is small. If the plant does not respond to this treatment, tap it out of the pot and see if there are worms or if the plant is too dry or too wet. If too wet, you are getting poor drainage and it is advisable to re-pot in a looser soil. If too dry, place in a basin of water, and continue the treatment every 30 days from then on besides the regular watering on the top.

Divide Large Plant

Insects on the top of the plant are generally easily removed by hand without recourse to any insecticide. If the plant is too large for the pot, you may divide it and re-pot the divisions. This is in case the plant is an Aspidistra, Sansevieria, Sword Fern, or the like. In the case of Coleus, Begonias, Calceolarias and similar plants, they need larger pots. Some Cyclamen, become mature and die away. In that case, let them dry out slowly, until they are thoroughly brown. Then cut away the top and store them on dark sides in the cellar or some dark place until it is time to take them out for a fresh start.

To View Eclipse

Bound for isolated Losap, a coral atoll in the Japanese mandated group, Prof. Josef Johnson of the California Institute of Technology will view an eclipse before it starts. The eclipse is scheduled to begin Feb. 14 and end Feb. 13, due to the fact it crosses the international date line. He sailed from San Francisco aboard the Chichibu Maru.

Sepulveda Funds Placed In Next Budget—Stanton

Completion of Sepulveda boulevard between San Fernando road and Long Beach, involving the construction of several links to tie in with the completed portion, will be pushed by the state highway commission. Los Angeles county officials were assured this week. The assurance came from Phil A. Stanton, who met with Chairman John R. Quinn of the board of supervisors, Supervisor Roger Jessup, chairman of the board's highway committee, and Supervisor Hugh Thatcher.

Stanton assured Supervisors Quinn and Jessup, through whose districts the artery passes, that funds for completion of this artery would be placed in the next budget.

Another major project to be pushed by the highway commission will be Rossmore boulevard, which task involves the connecting of a number of links already existing in an important north-south artery between the foothills east of Pasadena southward almost in a direct line to Seal Beach. Stanton resides at Seal Beach.

'Bonanza Town' Awakens Again

Virginia City, Nev.—center of the once famous Comstock Lode, whose mines produced over \$40,000,000 in silver in the 60's and the 70's—is showing signs of life after decades of somnolence, now that silver prices makes mining profitable. Above, air view shows Virginia City on the side of Mt. Davidson, and below it, some of the once-celebrated mines.

Cabin Boy Is Artist, Too

As Jang Gum Low, room steward on the liner Santa Teresa, goes patting about the business of making beds, you'd never suspect that he is a clever artist. Here he is with a pastel drawing that he did of Mae West on his last voyage.
