YOU COOK A FAMILY DINNER WITH NATURAL GAS FOR ABOUT THE COST OF A STICK OF GUM

A strange comparison! Yet, only such trifling items properly illustrate the low cost of natural gas.

In this region natural gas is by far the most economical of fuels for cooking, water heating and house heating. It's the fastest fuel too, and very efficient—an ever ready, obedient, yet unobtrusive servant in the home.

Consider heating. The average family keeps every room in the house warm and comfortable, through the coldest six months of the year, for seven or eight cents a day.

And remember, modern gas burning equipment might make your fuel bills even lower—because of more effective design, better insulation, and improved burners.
