**Oil Company Is Organized**

Formation of a \$100,000 corporation under the name of the Tom Clark-Torrance Petroleum Company was disclosed this week when articles of incorporation were filed with the county clerk in Los Angeles.

Directors are Thomas R. Clark, Daniel M. Hunsaker, M. F. Hobson, P. W. Willett and Oscar L. Willett, all of Los Angeles. The latter two directors are attorneys for the new corporation, it is stated, and no capital stock had been subscribed at the time the articles were issued.

**CHURCHES OF CHRIST, SCIENTIST**  
Semi-Annual Communion Services will be conducted on Sunday in all branches of The Mother Church, The First Church of Christ, Scientist, in Boston, Massachusetts. "Sacrament" is the subject of the Lesson-Sermon, and the Golden Text is from Hebrews: "To do good and to communicate forget not; for with such sacrifices God is well pleased."  
A Scriptural selection in the Lesson-Sermon includes these passages from John: "And he said unto them, Cast the net on the right side of the ship, and ye shall find; they cast therefore, and now they were not able to draw it for the multitude of fishes. . . . As soon then as they were come to land, they saw a fire of coals there, and fish laid thereon, and bread. . . . Jesus saith unto them, Come and dine. And none of the disciples durst ask him, Who art thou? knowing that it was the Lord."  
One of the passages from "Science and Health with Key to the Scriptures," by Mary Baker Eddy, states: "This spiritual meeting with our Lord in the dawn of a new light is the morning meal which Christian Scientists commemorate. They bow before Christ, Truth, to receive more of his reappearing and silently to commune with the divine Principle. Love."

**Pick Out the One Who's "Nerts"**

It would be suspected that when people rush about it's because of some good reason. Perhaps going to a fire, or something like that. It has been said that there's a surplus of leisure in America, but that everybody is in more of a hurry than ever before. Automobiles are made faster than ever. People drive faster than ever. They even die faster than ever. Most persons think the dare-devil aerial stuntist plays fast and loose with life. They say, "I wouldn't do that." They shudder when they see a window cleaner hanging by a life belt, high above the street. Most persons say, "I wouldn't do that." They watch with bated breath the structural steel worker walking almost gingerly around on the skeleton of a huge skyscraper. None of that for the average person.

The stunts of the rope walker, the trapeze performer, the high diver and all his brothers and sisters are not pursuits for the mere-run of individuals. Not by a jug full. But few drivers regard in a serious light the hazards of motoring.

To most there's nothing to worry about when a car is being driven at high rates of speed, or when a curve or corner is taken sharply, or when another car is met almost head-on at the top of a hill. The record of the occurrence of automobile accidents last year—the smashing of cars with trains, against trees and telephone poles and against bridges, the wrecking of cars going off the road, and the collision of cars at innumerable places—all go to indicate that many drivers don't realize the constant risks which only the utmost care makes it possible to avoid.

representatives are directly answerable to their own group of employees, and there are no restrictions on the choice of the employees as to whom they want to represent them. Almost without exception, the representatives have shown themselves to be fearless, fair-minded, and diligent spokesmen for the employees.

"About 90 percent of the employees voted at the annual elections of representatives recently conducted. This is to me clear evidence that the plan is satisfactory to the employees. Yet it is this very plan that this group of organizers declare they will destroy. The plan itself provides that it may be discarded at any time by action of a majority of the employees at any plant voting in a referendum election. And that is the only way the plan can be abrogated—even the management cannot rescind it.

"Through this plan, both men and management have learned the benefits of working together in peace and harmony. They have learned too, that they have one and the same interest—the success of the business.

"It is thru success alone that

A good, juicy, tender steak cooked to order is a work of art! A dry, tasteless steak is an insult to any appetite.

Keep your meats in an air-conditioned ice refrigerator. The cold, humid circulating air retains all the natural and healthful juices and, roasted or broiled, your meats will be perfection.

Ask your ice service man about air-conditioned ice refrigeration—or call your local ice company.

**An Open Letter**

**To the People of Torrance**

If, during the unavoidable confusion of the opening days of our new store, you were not accorded the customary courtesy and service which we have pledged ourselves to give, please accept our sincere apologies. The burden of the construction of the new building, the buying and marking of new merchandise, and the thousand and one details connected with our moving, account for any laxity in service and attention which may have occurred.

It is our sincere wish that all old and new Star customers are fully satisfied and that you will give us the opportunity to correct any oversight or omission.

We wish, also, to thank you for the generous and cordial reception accorded us at our opening, and to let you know that now, as always, we appreciate your patronage.

Sincerely,  
J. G. KOCH, Proprietor.
