"WHAT! MY REFRIGERATOR NOT COLD ENOUGH?"

How one woman found IT PAYS TO CHECK UP in this Hot Weather . . .

IS YOUR REFRIGERATOR COLD ENOUGH? Check-up Now!

Free THIS VALUABLE COLD-GAUGE!

U. S. Government Bulletins Warn that the temperature of the compartment in which food is stored must be kept at 50° or less if rapid development of harmful bacteria is to be avoided. . . . Prominent authorities agree 50° is the danger line. Let this free Cold-Gauge tell you whether your refrigerator is cold enough.

● You can't depend on sight, smell or taste. The one sure way to find out if your food is safe is to check up on your refrigerator—"take its temperature." This is why we, as local sponsors for National Food-Safety Check-Up, offer this valuable Cold-Gauge absolutely FREE to adults calling at our store. It's not an ordinary thermometer, but a special instrument designed expressly to take refrigerator temperatures.

If the temperature of your refrigerator is above 50 degrees, you are risking serious illness and may be losing money on food. Recent surveys show that an amazing percentage of refrigerators fail to keep safe, low temperatures during hot summer weather. So find out now if your food is in the Safety-Zone. Stop in at our store and get your Cold-Gauge FREE, while the supply lasts. Act at once. There is no cost. No obligation.
