20 Years From Now They'll Say We're "Lucky" Because Our Home Is Paid For

But it won't be "Luck" at all, --- simply being wise enough to take advantage of opportunities that are available to all!

Never in history has the Home Builder been offered anywhere near the advantages that are available under the newly liberalized FHA plan:

- Payments LESS than rent, including taxes, interest, insurance and principal payments;
- Initial investment only 10% of appraised values of house and lot, on homes valued at \$6000 or less.
- Low rate of interest... 5% per year.

CITY HONORS ITS BOYS DURING ALL NEXT WEEK

(Continued from Page 1-B) and other local industrial plants here and also inspect other industries in the Los Angeles area. Two faculty men will serve on the committee to direct the students thru the factories and check their attendance as regular school class work on these trips.

TUESDAY, May 3—COMING OF AGE: Details of this day's program have not been completely worked out but Mrs. Dorothy Jamieson, city librarian, has indicated she will assist in putting the facilities of the 30-day club may have boy-guests for a special program.

WEDNESDAY, May 4—IN SCHOOL: A boys' assembly has been planned and classrooms activities will center on boys' problems with panel discussions arranged in many subjects.

THURSDAY, May 5—IN CITIZENSHIP: This should be one of the most outstanding days of the week. Mayor William H. Toison has offered to place representative boys in the various municipal offices and departments so they can learn how the "municipal machinery works."

FRIDAY, May 6—IN LOYALTY: James H. Scott of the local American Legion post is in charge of the program for this day which will center around interpretation of loyalty to American ideals and institutions, flag etiquette and patriotic support. This program will probably be presented at the high school with all boys attending. Friday is also "Boys' Day in Safety" and Lee Roy Benner, chairman of the school safety committee, is arranging with Police Chief G. M. Calder for talks and demonstration of pedestrian and motorist safeguards.

Speak Your Piece

(Continued from Page 1-B) dogs, all right.

But my tip to the authorities who want to see helpless children removed from an ever-present menace. And to save from a dire fate ignorant grow-ups, who perhaps wouldn't recognize a rabid animal if they met one in an alley. My tip, I say, is that they take some of these maudlin sympathizers to a hospital to look upon the maddened writhings and horrendous condition of a human victim dying from rabies (there have been more than 20 in Los Angeles county) or to the pound to note the sufferings of an animal in the last stages.

Now I like dogs, and I appreciate the feeling that everyone has for his pet. But it seems to me that the sympathies of the Tail-Waggers Foundation might be reserved for future use. Let the authorities have their day and perhaps rabies can be cleaned up. An ounce of prevention is worth a pound of cure says the old saw. And in this case prevention is worth infinitely more, for there is no cure for rabies.

R. I. QUAINT
"Past President of the Society for the Prevention of the Prevention of Quarantines."

presented at the high school with all boys attending. Friday is also "Boys' Day in Safety" and Lee Roy Benner, chairman of the school safety committee, is arranging with Police Chief G. M. Calder for talks and demonstration of pedestrian and motorist safeguards.

This is also "Boys' Day in Radio" and Francis Waddingham, chairman of the high school science and mathematics department, has made plans for taking a group to radio station KFI for an inspection of that broadcasting plant.

SATURDAY, May 7—IN THE COMMUNITY: Here will be another highlight of the week. Some 50 outstanding boys of the city will be invited to a special meeting of the Chamber of Commerce arranged by Secretary L. J. Gilmeister. They will participate in a round-table discussion of the community's organization, how the city functions and the relationships of business, industry and civic groups to municipal progress.

HARBOR DAY QUEEN

Los Angeles Harbor invites all Southern California to "Harbor Day" Saturday, April 30, when the United States Fleet will return from Pacific maneuvers and old and new boats, both domestic and foreign will engage in a "parade of ships." Pretty Joyce Mathews, Paramount starlet in "Give Me A Sailor," is shown on the wind-jammer "Sanwan" waving her "Harbor Day" greeting. The sponsoring Junior Chambers of Commerce of Los Angeles, San Pedro, Wilmington and Long Beach have arranged free water taxi excursions for all.

Free excursion tickets for trips to the many interesting points at Los Angeles harbor may be obtained at the Chamber of Commerce. Local residents who have not seen the harbor development for several years will find the water trip most interesting. L. J. Gilmeister declared.

HEALTH, SIGHT BENEFITED BY PROPER SURROUNDINGS

Correct lighting in the home plays an important part in maintaining the health of the family. In planning a new home or in modernizing an old one the lighting system should be given close study and the interdependence of paint with light taken into consideration.

Importance of choosing the best available fixtures and wall colors that readily reflect light without glare is evident. Painters, builders, and electricians combine to give their best efforts for satisfactory results in order that buildings of all kinds may be made more comfortable and efficient places in which to live and work.

Dark, gloomy days may be painted away, and with proper lighting the surroundings can assume a cheerful, stimulating atmosphere.

Loans to finance new lighting systems or to redesign old ones may be obtained under the Property Improvement Credit Plan of the F.H.A.

South Diagonal Highway Should be 'Free-Way'

Any consideration given to a proposed diagonal highway between Redondo Beach and Riverside county should be on the basis of a free-way thoroughfare, County Road Commissioner George Jones said this week in replying to a resolution of the Redondo Beach city council. It would connect with an existing route in Riverside county.

All intersections should be eliminated, and such a proposal, said to have been advanced originally by Riverside promoters, would be expensive and would not be justified unless it is to be more than "just another road," Jones said.

Plan for Future
A diagonal connection with Sepulveda boulevard at some point north of Hermosa Beach would be a desirable addition to the project to allow traffic to by-pass the congested area in Redondo and Hermosa Beach.

"Magnitude of the proposed project indicates extensive investigation and design studies would be necessary, but it is entirely probable that at the time such a project could be planned, the right-of-way obtained and the cost of construction financed, there will be ample traffic available for it," the county road commissioner added.

HOME SHOW HAS WIDE VARIETY OF EXHIBITS

Hope to Stimulate Property Sales by Notifying Realtors

Realty boards are to be notified henceforth whenever the board of supervisors disposes of county-owned property, under a new policy suggested by Supervisor H. C. Legg.

The plan was suggested in order to stimulate bidding on property sales, when only one bid was received recently by the board on a parcel of improved property sold in Santa Monica.

New Materials For Modernizing Baths

Many of the new materials on the market for modernizing bathrooms may be adapted to the out-moded bathroom of 10 years ago.

A wide variety of tile and composition is available, all waterproof, which makes ideal side walls and flooring and may be obtained in a number of colors. Fixtures have been improved and simplified, and bathtub designs have been changed and improved.

An old bathroom may be completely transformed by a rearrangement of fixtures and addition of new wall and floor material. Projects of this type may be financed under the Property Improvement Credit Plan of the F.H.A.

Exterior Lighting May be Indirect

The outside of the house may be illuminated successfully with indirect lighting.

Illuminated panels at the side of a doorway, or directly over it, will display the house number advantageously and light the path and the steps. A light so situated that it illuminates the walk between house and garage is particularly useful.

Houses may be rewired thru funds obtained from a bank or other private financial institution insured under the Property Improvement Credit Plan of the F.H.A.

PROSPECT

The brightest spot in the Spring real estate market is the active demand for residential properties in suburban areas. Brokers and dealers attribute the increased demand to the new financing facilities made available by recent amendments to the National Housing Act.

NEW DECORATION

Newest schemes of interior decoration feature the bold use of color and a return to the styles that held sway during the early part of the past century. Wallpapers especially designed to contribute to the new theme are colorful and quaintly figured.
