CHAMPION EYES CHAMPION

Shortly after Meissen, champion of Peru, landed at Los Angeles he was shown a huge enlargement of Whirlaway, three-year-old champion of the United States. The Peruvian price exhibited keen interest in the Thoroughbred he may meet in the \$75,000 Hollywood Gold Cup to be contested at Hollywood Park, July 19, for which both have been nominated. Meissen, imported by A. T. Jergins, California sportsman, spent 20 days and nights standing in a small stall on the voyage from Callao, Peru, to Los Angeles—a severe test of his patience and stamina. He shipped in perfect condition.

Tax Group Says
School Budget to
Up Levy 18 cents

The Los Angeles school district tax rate will be at least 18 cents higher next year than it is for the current year, unless drastic cuts are made in the \$44,594,728 school spending program now being considered by the board of education, declared California Taxpayers' association, following its analysis of the tentative school budget for 1941-42.

The proposed budget is \$1,110,000 higher than the budget for the present year and it is \$3,254,000 higher than the total estimated for this year, the association stated.

"For the current year, the school tax rate is \$1.792 per \$100 of assessed value," the association stated. "However, it will require a tax rate next year estimated at \$1.98, based on current assessed valuations, to finance the spending program proposed in the tentative budget. This is a threatened increase of 10 per cent in the school tax rate alone," the association declared, pointing out that citizens have the right and duty of making their ideas on school spending known to their representatives—the members of the board of education.

Estimates of enrollment for the coming year, based on enrollment and attendance records of the school district for the nine months of the present school year which have already been completed, indicate that the total enrollment for all levels of the public schools of Los Angeles next year will be 277,050, practically the same as the 276,950 for the present year, the association stated.

BURGLAR SHOWS PRIDE
MONTREAL — (U.P.) — Gerard Lebeau, is a stickler for accuracy. Lebeau doesn't mind being blamed for what he has done but when he was accused of stealing some butter during a burglary, he indignantly denied it. "I stole the cash," Lebeau said, "but not the butter."

Where's the best place
to choose your new car?

A. ON THE ROAD!

WE'LL MATCH the "showroom value" of the Ford with anyone... but if you want to know how great a car this is, take one out on the road. That's where you use a car. That's where we build the Ford to be at its best!

TEST THE PERFORMANCE... IN ACTION. There never was another low price engine like this 90 horsepower Ford V-8. Take it out in traffic—then step out on the open road—challenge the toughest hills. Draw your own conclusions—see why no other low-priced car has even attempted to match it.

TEST THE RIDE... IN ACTION. Ride on the pavement, then ride the roughest road you know. You'll find the new Ford ride is the kind of ride you like. Smooth where the going's good. Soft and steady over the bumps.

TEST THE ROOM... IN ACTION. Measurements show this Ford greatest in its whole field in actual passenger

space. A ride will show how much this means. Take the front seat, then the back. Cross your legs this way, then the other. Bigness counts and here it is!
TEST THE VALUE... IN ACTION. Stop with the biggest hydraulic brakes anywhere near the price. Rest your toe on the pedal of a fine-car type of semi-centrifugal clutch. Elicit through the gears with the easy, silent kind of finger-tip shift that high-priced cars use.

GET THE FACTS AND YOU'LL GET A FORD!

FORD HAS THE
QUALITY FEATURES

V-8 POWER—90 smooth horsepower. There never was a low price engine like this before.

NEW BEAUTY—When you look at the smooth flowing lines you see one of the few cars with really up-to-date styling this year.

A NEW RESTFUL RIDE—On the new Ford "Slow Motion Springs." A soft, quiet ride wholly new this year.

EXTRA VALUE—New ease of control with positive mechanical, fine-car type shift—extra-big hydraulic brakes—and the famous Ford semi-centrifugal clutch.

There are more than 30 Ford "Exclusives"—some of them found only on higher priced cars—and all of them found only on the Ford in its price class.

Today's Lesson in
Flag Etiquette

● Bunting should be used for platforms or for the decoration of speakers' stands and for general decorations. The blue stripes should always be placed uppermost and the red at the bottom.

● On patriotic occasions, the flag may be displayed above and behind the speaker against a wall or curtain. If flown from a staff, it should be placed at the speaker's right.

● In church, the flag should be placed at the congregation's right. Other flags should be placed to the left of the congregation. In the chancel, or on a platform, the flag should be placed at the clergyman's right as faces the congregation, and the other flags at his left.

● When one halyard is used for two or more flags, the American flag should always be flown at the peak. In displaying flags on adjacent staffs the American flag should be hoisted first and lowered last.

● When the American flag is displayed with another flag with staffs crossed, the American flag should be on the right, with the staff over the staff of the other flag.

This is the fourth of a series of five lessons in "Flag Etiquette" as approved by the National Department of Americanism, Veterans of Foreign Wars of the United States, offered by The Torrance Herald and The Lomita News as a timely patriotic feature designed to stimulate proper observance of National Flag Code regulations.
