**Butylenes Shift Not to Effect Tires**

The diversion of 400,000 barrels of butylenes from the synthetic rubber program to high-octane gasoline production will not affect the tire output, it is reported.

Rubber Director Dewey has explained that current restrictions on the manufacture of tires are due to manpower shortage rather than to a scarcity of synthetic rubber.

George Hemenes of Beverly Hills has been appointed as an assistant Red Cross field director.

**Church Notices**

NOTICE: Copy for Church Notices cannot be accepted after 10 a. m. Tuesday.

"Thou, O Lord, art a God full of compassion, and gracious, long-suffering, and pitiful in mercy and truth." This declaration of the Psalmist will be the Golden Text in the Sunday Lesson-Sermon on "Truth" in all branches of The Mother Church, The First Church of Christ, Scientist, in Boston.

Jesus, according to an account in Luke's Gospel, "went into the synagogue on the sabbath day, and stood up to read. And there was delivered unto him the book of the prophet Isaiah." And he read, "The Spirit of the Lord is upon me, because he hath anointed me to preach the gospel to the poor; he hath sent me to heal the brokenhearted, to preach deliverance to the captives, and recovering of sight to the blind, to set at liberty them that are bruised, . . . And he began to say unto them, This day is this scripture fulfilled in your ears."

Mary Baker Eddy says in "Science and Health with Key to the Scriptures": "The Scriptures are very sacred. Our aim must be to have them understood spiritually, for only by this understanding can truth be gained." "It is this spiritual perception of Scripture, which lifts humanity out of disease and death and inspires faith."

Fishermen from the South Fork of the Feather River area report trout fishing is good.

**U. S. RUBBER PROVIDES NEW SYNTHETIC COMPOUND USED IN U. S. NAVY WAR CRAFT**

By utilizing a special compound of synthetic rubber, U. S. naval forces have acquired an added margin of fighting efficiency. Naval authorities allowed it to be revealed today that special coverings of the synthetic compound are being placed around the propeller drive shafts of cruisers, battleships, destroyers and escort vessels of all kinds.

The important new application for the test tube rubber is made possible through the discovery of a method by U. S. Rubber Company scientists of a way to successfully cure and bond the synthetic rubber solidly to the metal shafts.

The use of this new protective process prevents the pitting of the drive shafts through electrolysis, a condition which occurs when metal is immersed in salt water. Deterioration was so rapid under this condition that in many cases the shaft would become useless in three months.

The fighting efficiency of the ship was thus impaired and the danger of breakage at sea or in battle, necessitated the vessel being placed in drydock periodically. By eliminating the need for repair or the replacement of the shaft, cruising time and range is increased materially. Other advantages of the new device are its greater safety and smaller repair costs.

The new process enables the synthetic compound to be chemically welded to the steel shaft.

**Army Makes Tire Repairs Under Fire**

Major tire repairs can now be made in 10 minutes anywhere in a combat zone by means of electronic tire vulcanizing device, reports the Automobile Club of Southern California. The 500-pound mobile military unit was developed by the War Department Transportation Corps after experience in the field had demonstrated that existing equipment was too slow and unsatisfactory.

The new vulcanizing machine can effect repairs on any size tire without the use of molds, and it eliminates current vulcanizing hazards such as overheating of adjacent sections.

**BAIRD NEW OPA HEAD**

Charles R. Baird, deputy regional administrator of the Office of Price Administration for the past 10 months, will assume the duties of regional administrator, in charge of west coast OPA activities, on Saturday, July 15.

The disposition to give a cup of cold water to a disciple, is a far nobler property than the finest intellect.—Howells.
