DEER HUNTERS ARE ASKED TO SAVE HIDES

Deer hunters are urged to save deer hides this season so they can be used to manufacture gloves and necessary flying equipment for the armed forces. With an average of 35,000 deer killed each year, less than 10 percent of the hides have been used.

The division of fish and game offers nimrods the following suggestions to safeguard the deer skin: 1. Avoid dragging the animal 2. Skin carefully, avoiding cuts, removing all fat and meat 3. Rub plenty of salt on the flesh side of the skin; be sure that you do not miss any of the folds or edges of the skin 4. Either dry the skin in a cool, shady place or roll it up with plenty of salt 5. Do not expose to the sun or heat and if the skin is to be dried, allow plenty of air circulation.

Collecting and forwarding agents for deer skins are Boy Scout headquarters, offices of the California State Farm Bu-

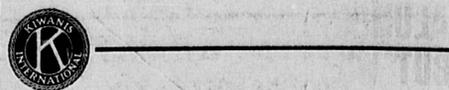

Shriners Plan Long Beach Rites Friday

A Curb to Crime...

As we who are engaged in law enforcement face the future, we hope for the day when crime among the youth of America will be substantially reduced. The Federal Bureau of Investigation is equally as interested in the prevention of crime as in its punishment. Sunday Schools have been a bulwark against crime and delinquency in the past and their future in this regard is bright. Proper support to insure the continued growth of this institution presents a challenge to the American citizenry.—J. Edgar Hoover.

BUT THE COST OF Electricity IS STILL LOW

"WAGES are at the highest level in years, but with the cost of living up about 26% since 1939, dollars do not go as far as they did. Yet while most prices climb steadily higher, the price of electricity remains low. It is an important living cost that has actually gone down instead of up! Edison electric rates have been reduced twice since 1939. That is why, although you use more electricity now than before, your electric dollar goes farther.
