

Postwar Home Exhibit To Be Held In Pan Pacific Auditorium In July

What the modern postwar home will offer will be shown to the nation next year in a huge Pan-Pacific Auditorium exhibition of house construction and newest appliances and furnishings, sponsored by a non-profit corporation of eleven building trade associations, and the Los Angeles Chamber of Commerce, Milton J. Brock, president of the sponsoring group announced today.

"July 12th to 21st inclusive has been selected as the dates for this first annual Southern California Construction Industries Exposition and Home Show," said Brock.

"At this time the exhibitors will present the newest developments of postwar materials, designs and processes which can be applied toward making new or reconverted homes more convenient, comfortable, healthful and enjoyable.

"A principal feature of the

exhibition will be a complete exhibition of new designs and construction developments in commercial, industrial and public buildings and scale models and maps of proposed airports, freeways and community development projects.

"In addition to the attractions inside the huge auditorium, complete model homes of various designs, types and sizes will be constructed on the grounds outside the main building."

President Brock's fellow officers are Earl S. Anderson and Frank Jani, first and second vice-presidents; Lawrence Gibbs, secretary; and A. L. Stone, treasurer. Management is under the direction of the Tabery Corporation.

The following organizations will be sponsors: Associated General Contractors of America; Southern California Chapter; Building Contractors Association of California, Inc.; Contracting Plasterers Association; Heating, Pipe and Air Conditioning Contractors Association; Mason Contractors Exchange of Southern California; Merchant Plumbers Association of Los Angeles; National Electrical Contractors Association, Los Angeles Chapter; Painting and Decorating Contractors Association; Refrigeration Contractors; Sheet Metal Contractors Association.

SMOKE ABATEMENT

A meeting has been scheduled for Nov. 20 between the mayors of various cities in Los Angeles County and the Board of Supervisors to discuss smoke and furnace abatement problems, according to an announcement made today by Supervisor Rogers Jessup.

The day becomes more solemn and serene. When noon is past: there is a harmony. In Autumn, and a luster to its sky. Which through the Summer is not heard or seen. —Shelley

Local Shriners Urged By Potentate William G. Paul To Make Huge Success Of Forthcoming Victory Bond Campaign

Joe Morgan, chairman of the community division of the War Finance Committee, is shown outlining to Al Malakiah Temple's head man, rehabilitation program planned for returned servicemen, toward which much of the revenue derived from Victory Bonds will be allocated. There are more than 13,000 Shriners in Southern California and the potentate has designated each noble a committee of one to see that the drive goes over the top in a big way.

Palos Verdes Schools Adopt Planning Policy; New Buildings and Courses

The Board of Trustees of the Palos Verdes School District has adopted a planning policy which may be divided into three parts: (1) provide new housing and facilities as soon as possible to relieve overcrowded conditions at Malaga Cove and make possible added courses in orchestra, home-making and industrial arts—this will require a bond issue. (2) make a comprehensive plan for adequate auditorium and gymnasium facilities which can be completed when and if Federal assistance is made available for this purpose; (3) cooperate with all other groups and individuals in making a study of the total Community educational and recreational needs.

The Board of Trustees recommends that citizens of the community become familiar with conditions in the Malaga Cove School by visiting the buildings when classes are in session. Some important classes, such as industrial arts and home-making cannot be taught for lack of space and equipment.

The need for an auditorium is indicated by the fact that when a public school program is given the children must remain away in order to make room for the parents and visitors. The present school enrollment alone fills the auditorium. There is also a need for gymnasium facilities for upper grade boys and girls. The gym would be useful for all classes during rainy weather.

Investigations indicate that the population in this area is going to increase rapidly in the near future. There is already much evidence of a need for additional recreation facilities and planning for winter and summer programs. It has been the purpose of the Board to serve as the agency to bring together individuals and organizations interested in these common problems and then join with them in working out a comprehensive plan of action. The comprehensive plan for community development should meet the needs of all constructive educational, social, and recreational organizations.

Cost of Living Continues To Climb In Area, Labor Department Reveals

Seasonally higher prices for eggs were mainly responsible for a two tenths of one percent increase in the cost of goods in the family budget between July and August, according to the Bureau of Labor Statistics of the U. S. Department of Labor. Charles A. Roumasset, local economist for the bureau said that during this last month of World War II the consumers' price index for moderate income families in Los Angeles area rose to 130.9 percent of the 1935-39 average and is now 2.6 percent above the level of a year ago.

Over the six years between August, 1939 and the announcement of the Japanese surrender in August, 1945, prices of living essentials in Los Angeles area have risen 80 percent. The cost of food advanced 54 percent, clothing 40 percent, house furnishings 42 percent, and miscellaneous goods and services 25 percent. Rents, which have been relatively stable, have increased only 3 percent, and average prices for fuel, electricity and ice have declined more than 6 percent since the start of the war.

WRONG LABELS

Further action to revise regulation in connection with the labeling and handling of deadly drugs at the Los Angeles County General hospital was dictated by county supervisors today until there is a conference with the institution's lay advisory committee.

Whether zeal or moderation be the point we aim at, let us keep fire out of the one, and frost out of the other. Addison

ed 0.4 percent over the month as consumers paid higher prices for men's work trousers, undershirts, women's cotton dresses, coats and rayon hose; while retail stores reported apparel stocks to be lower than at any time since the start of the war.

Warren Acts As Chairman Of Fund Drive

Governor Earl Warren has accepted the honorary state chairmanship of the Sponsor Committee on the Native Sons and Native Daughters Central Committee's campaign for funds to enable those two pioneer organizations of native-born Californians and women carry on their work of finding foster parents for homeless children.

A native-born Californian himself, Governor Warren has long taken an active part in the many activities of the Native Sons of the Golden West of which he is a member. Particularly appealing to him has been the homeless children work, carried on for the past 35 years with funds raised entirely within the membership of the Native Sons and Native Daughters.

The war years, however, have imposed added burdens upon the central committee which directs this homeless children activity. The cost of caring for the children during the period required by California adoption laws before they can be offered for adoption, has tripled and quadrupled in many instances. The unprecedented growth of California's population during wartime, has meant an increase in homeless babies and increased demands by childless parents seeking to adopt orphans and children from broken homes. Trained social workers employed by the central committee carefully investigate prospective foster parents and an increase in worker staff is necessary to keep abreast of this work.

The need for an auditorium is indicated by the fact that when a public school program is given the children must remain away in order to make room for the parents and visitors. The present school enrollment alone fills the auditorium. There is also a need for gymnasium facilities for upper grade boys and girls. The gym would be useful for all classes during rainy weather.
