

### STOP SIGNS TO BE INSTALLED AT DEL AMO AND ALAMEDA

Boulevard stop signs are to be installed on each side of Del Amo Blvd., at its intersection with Alameda st., in the Dominguez area, by order of the Board of Supervisors, according to Supervisor Raymond V. Darby. This action was taken upon recommendation of the County Traffic Committee, which reported a very serious accident record at that location.

### SAMPLE BALLOTS TO BE MAILED FOR JUNE 4 ELECTION

Sample ballots for the direct primaries election in June will be mailed to voters sometime during the period May 10-30 inclusive, it was announced at the office of the Los Angeles County Registrar of voters. May 10 is the first date on which the sample ballots may be mailed, and they must be mailed not later than May 30, it was stated.

### Police Revolver Club Posts Scores

The Torrance Police Revolver Club competition scores for the week ending April 14, are as follows: E. M. Ashton, three strings, 280.3 average; Oliver Medicus, four strings, 278.3 average; A. Miller, four strings, 233.5 average; and Carl Erbergs, two strings, 208.5 average. Membership in the Revolver Club still is available to non-members of the Torrance Police Department, it was announced.

### Right Guide

This column is designed to give official VA answers to Veterans' readjustment problems. Send questions to: **RIGHT GUIDE**, 1041 South Broadway, Los Angeles 15, Calif.

**Question:** What are the major changes in the GI Bill regarding home loans?  
**Answer:** Increase in the realty guaranty from \$2,000 to \$4,000, terms of home and realty loans extended to 25 years, farm realty loans extended to 40 years, and non-realty loans to 10 years. The most important change is the automatic guaranty by VA of loans made by supervised lender.

**Question:** My wife and I are both veterans, how much will the government guarantee on a joint home loan?  
**Answer:** Both you and your wife are eligible to receive the benefits of the Act. However, the government will in no case guarantee more than 50 percent of a loan made on a single piece of property. If you and your wife wish to use the full amount of guaranty on a joint loan (\$4,000 each, \$8,000 together) your loan would have to be for \$16,000 or more. Less than this, you may split the guarantee amount of 50 percent of the loan any way you like.

**Question:** If I should die during the life of the loan, what happens?  
**Answer:** It is up to the lender to preserve his rights. If agreeable with the lender the loan may continue on the property. Loans are made on the deal and not on the individual.

**Question:** Will the government ok a loan made to me by my father?  
**Answer:** It is permissible under the Act provided he is capable of servicing the loan and prior approval is obtained from the VA loan guarantee office.

**Question:** Is the size of the loan based upon my income?  
**Answer:** There is no limit on the size of the loan, the limit is in the amount of guaranty. However, the veteran's anticipated income and expenses must show a proper relationship to the payments to be made on the loan. Lenders look more favorably on a loan which does not exceed more than two and a half times the annual income, or when the monthly payments made on principal and interest do not amount to more than one-fourth to one-third of the monthly income.

**Question:** I want to construct a combination home and business. Shop in front and living quarters in the rear. Is this a home or business loan?  
**Answer:** This would be a home loan. Loans are actually divided into two classifications: really and non really.

**Question:** I want to construct a combination home and business. Shop in front and living quarters in the rear. Is this a home or business loan?  
**Answer:** This would be a home loan. Loans are actually divided into two classifications: really and non really.

### Produce Oil To Meet Demand, Minckler Plea

"By 1950, California will reach the end of its power to produce petroleum in excess of demand," R. L. Minckler, vice-president of General Petroleum Corporation, declared to the meeting of the American Petroleum Institute's Pacific Coast Division in the Hotel Biltmore, Thursday.

For this reason he urged that the petroleum industry should embark on a program of producing only enough to meet demand.

"We will have productive capacity in excess of demand for the next two or three years, and then we shall run short," Minckler predicted.

"The producers of California have two choices in the management of this short-term productive excess. We can produce it now, and force that surplus on an uneconomic market, or we can produce only to meet economic demand, thereby deferring the time of shortage and producing the oil when it is needed."

"We confidently expect that domestic demand in the Pacific coast area will exceed all previous peace-time levels by a substantial margin," Minckler continued.

"We believe that military requirements will be two or three times those of previous peace-time years."

"The test of actual experience with these low inventories indicates that for maximum efficiency of the industry, we should have some increase in stocks."

### Three New Wells Started In Local Oil Field

Oil field operations reported during the week ending April 6, 1946, show 42 notices to drill new wells filed, as compared with 38 during the previous week. Of the 42 notices to drill new wells filed this week, 14 were for wells in the Wilmington field, 3 in the Torrance field, 1 each in the Dominguez field, Huntington Beach field, Imperial Carbon Dioxide Gas field, Piru field, and San Luis Obispo County, 5 in the Edison field, 4 in the McKittrick field, 2 in the Mountain View field, 1 each in the Poso Creek field, Round Mountain field, Sunset field, Temblor field, and Tulare County, 2 in Kern County, 1 in the Jacalitos field, and 1 in the Big Vista Gas field. Total new wells this year, 486, as compared with 639 at the same date last year.

The new Torrance Wells are Wood-Callahan Nos. 7, 8 and 11, in Section 5, Township 48, Range 14 West.

Deepening or redrilling jobs this week numbered 24, as compared with 12 during the previous week. Total to date this year, 224; total to same date last year, 237.

Abandonments this week numbered 10, as compared with 11 during the previous week. Total to date this year, 180; total to same date last year, 154.

### Probate Not Needed In Some Veterans' Cases

The legal heirs of deceased members of the armed forces now may claim amounts due them from the United States without obtaining letters of administration or letters testamentary. In other words, the \$1,000 limitation has been removed.

This means that the heirs need no longer go through the probate court, the probate department of the Los Angeles Superior Court said.

The information was contained in a memorandum from the Office of Special Settlement Accounts, Washington, D.C.

"In such cases, (the) client should address a letter to the General Accounting Office, stating that (she) has received \$1,000, and asking that any balance due (her) be remitted without further letters," the memorandum stated.

Five acres and four large buildings will be required to house the Spring Flower Show in Brookside Park, Pasadena.

### Installation Of Telephone Booster Equipment Due Late Next Year

Construction work on 28 small concrete buildings spaced about eight miles apart between Los Angeles and the Colorado River started this week by the Southern California Telephone Company. The buildings will be used to house amplifying equipment for the new transcontinental coaxial cable scheduled to be completed late next year.

Automatic "booster" equipment necessary to maintain an adequate flow of current passing through the coaxial cable will be housed in the new buildings, which are designed especially to retain even temperature conditions.

Extending from Los Angeles eastward, the Southern California segment of the coaxial cable—named because each of its eight tubes has a copper wire as its axis through which high-frequency current is directed—will pass through Alhambra, El Monte, Covina, San Dimas, Upland, Cucamonga, Fontana, Redlands, Yucaipa, Beaumont, Banning, Cabazon and Whitewater. It will then cross the desert, following close to the route of the Los Angeles aqueduct, and pass through Desert Center before reaching Blythe.

The small repeater buildings housing the vital re-energizing equipment will be erected in or near all towns through which the cable will pass except Whitewater and El Monte. At these places the coaxial cable will pass through the existing telephone buildings.

Contract for the erection of the new repeater stations has been let to Jutes Markel of Santa Ana. Construction crews are at work along the entire 240-mile route from Los Angeles to the Colorado River.

The cable's eight coaxial tubes will each be capable of carrying 480 one-way telephone conversations. The complex cable also is suitable for the transmission of radio and television and eventually may carry transcontinental television programs because it can provide state-free, even reception over long distances.

When the new coaxial goes into operation, the present 1,500 long-distance circuits connecting the east and the west coasts will be materially expanded, and about half of the new channels will lead directly to Los Angeles.

### Chamber Seeks Statewide Fish, Game Committee

Recommendation that the causes of sportsmen, commercial fisheries and small harbor development be espoused by the California State Chamber of Commerce was voted in a San Francisco meeting of the State Chamber's statewide natural resources committee. After sportsmen, commercial fishermen and others spoke, the committee prepared for consideration by the State Chamber's board of directors, recommendations that:

1. A statewide committee be created by the State Chamber of Commerce to coordinate and assist the efforts of local and regional groups working for improvement of fish and game conditions—both by sportsmen and commercial fishing interests.

2. The State Chamber support a general program of small harbor development along the California coastline through creation of a statewide committee to coordinate and assist local communities.

The fish and game committee plan—recommended by the State Chamber's Central Coast and Central Valley councils—received enthusiastic presentation.

### STREET WIDENING IN DOMINGUEZ DISTRICT PROMPTS RESOLUTION

As both Santa Fe avenue and Dominguez street, in the Dominguez area, are being widened and improved and it is expected that both streets will carry a considerable volume of traffic, including heavy commercial vehicles, the Board of Supervisors, according to Supervisor Raymond V. Darby, ordered a resolution prepared which will have the effect of stopping traffic on all intersecting streets at the two thoroughfares mentioned.
