

Use New Phone Book After Aug. 3. Request

Starting yesterday morning and continuing until midnight of August 3, the time set for the cut-over to dial service, over 29,000 new San Pedro-Wilmington telephone directories will be delivered to telephone subscribers and all telephone stations in San Pedro, Wilmington, Lomita, Torrance and Avalon, it was announced today by Floyd Y. Snyder, district manager of the Southern California Telephone Company.

The old directories will not be collected as the new ones are delivered, but the manager suggested that they be turned in after August 4 to local paper salvage groups, as scrap paper is still needed.

Snyder said that there have been many number changes made and strongly recommended that starting midnight on Aug. 3, all telephone numbers be checked in the new book before calls are dialed. For instructions on how to use the dial telephone correctly, Snyder pointed out that there is complete information in the front of the directory. Emergency numbers and how to call them are also listed in the front of the directory.

Extended service subscribers in San Pedro may dial TERNAL, NEWARK, MELO and METCAL numbers directly but must dial the red "0" and reach the operator to place other calls in the extended service area. The

OPA Suspends 21 Licenses Because Of Sugar Deals

Twenty-one Southern California business concerns, including markets, restaurants, bakeries, a candy manufacturer and a food processor, have lost their right to deal in rationed sugar for periods varying from five days to the duration of rationing of the scarce item, it was announced by OPA today.

Penalties, license suspension, were decreed by Acting Chief Hearing Commissioner Milton Koss following administrative hearings conducted in Los Angeles over a 30-day period. Charges ranging from overdrafts on ration bank accounts to possession of counterfeit stamps and sugar purchases without surrendering ration currency were preferred against the individual respondents.

extended area also includes Long Beach, Torrance, Redondo and Lomita, reached by dialing the operator.

Local service subscribers may dial the red "0" and reach the operator to place other calls in the extended service area. For all long distance calls the number to dial is 110. For repair service is 114. For information to get numbers not listed in the directory—113. To obtain the correct time—ULrich 8900.

All subscribers should receive their new directories before August 4, Snyder said.

Safety Councils Formed In Many California Cities

Community traffic safety councils have been formed or are in the process of formation in more than a dozen California counties, the Department of Motor Vehicles revealed today.

Declaring the general public is in a mood to do something about the traffic accident situation, Director Edgar L. Lampton reported county conferences have been held or called in Kern, Merced, Tulare, Fresno, Madera, San Bernardino, Ventura, Santa Barbara, Monterey and Contra Costa counties within the last three weeks.

Similar meetings are being considered in Stanislaus, Riverside, Orange and Santa Clara counties.

The plan of organization follows closely that proposed at the President's Traffic Safety Conference in Washington, D.C. in May, and approved at the State Conference held by Governor Warren in Sacramento June 7.

Several counties, he said, have taken steps toward insuring a continuous safety education program by raising funds and employing full-time safety directors.

Lampton expressed the hope the movement will continue until every county has an active safety organization working with all interested groups and the general public toward a reduction of accidents. He invited public officials and citizens interested in forming safety councils to avail themselves of the assistance of the newly formed Bureau of Traffic Accident Prevention set up in the Department of Motor Vehicles.

He stressed, however, that the state's part in formation of local groups is advisory only, adding it is the desire of interested state officials that local groups have complete freedom in carrying out organization details of local councils.

"The movement should spring from the people themselves and not from the state," he said. "We want to give local groups all the help possible and will do so if invited, but we will not presume to tell them what to do or how to do it," Lampton said.

Measles Subside, Health Officer Says In Report

Measles, which are ordinarily epidemic every five years, but which broke out of line this year, have finally subsided, according to the Los Angeles county health department's weekly report issued by Dr. Roy O. Gilbert, acting county health officer, the disease falling to 74 reported cases last week.

Statistics show that this disease runs in cycles with every fifth year a possible epidemic one. For the first half of 1944 reported cases reached an all-time high of 25,188 in the county and 1946 should have been a non-epidemic year if it ran true to form. Instead, 18,802 cases have occurred as compared to an average non-epidemic year of 3,765 to date.

In the Torrance health district, only seven cases were reported for this same week, Dr. H. C. Smiley, district health officer, said.

No proven immunization has been discovered as yet, Dr. Smiley said. Families in which measles "pop up" are not quarantined, although the disease is among those reportable to the local health office.

More Flyable Planes Available

Air-minded veterans of World War II get first chance of five more "flyable" surplus airplanes during the War Assets Administration's sale at Cal Aero field, near Ontario, from August 13 to 27, according to Leo R. McGehee, regional aircraft chief.

The August 13 offering includes two Grumman "Widgeon" amphibians at \$17,500, two C-47 Douglas cargo transports at \$22,500 and a Beechcraft five-place single-engine cabin plane at \$14,000.

The Golden Text of the Sunday Lesson—Sermon on "Love" in all branches of The Mother Church, The First Church of Christ, Scientist, in Boston, will be Paul's statement to the Corinthians: "Be perfect, be of good comfort, be of one mind, live in peace; and the God of love and peace shall be with you."

A Scriptural passage from Ezekiel reads, "For thus saith the Lord God, I, even I, will both search my sheep, and seek them out. . . and will deliver them out of all places where they have been scattered in the cloudy and dark day. . . I will feed my flock, and I will cause them to lie down, saith the Lord God. I will seek that which was lost, and bring again that which was driven away, and will bind up that which was broken, and will strengthen that which was sick. . . And ye my flock, the flock of my pasture, are men, and I am your God, saith the Lord God."

"Divine Love always has met and always will meet every human need," says Mary Baker Eddy in "Science and Health with Key to the Scriptures." Again she writes, "Love inspires, illumines, dignifies, and leads the way." "Love is impartial and universal in its adaptation and bestowals. It is the open fount which cries, 'Ho, every one that thirsteth, come ye to the waters.'"

NOTICES ARE FILED TO DRILL TWO NEW WELLS IN TORRANCE

Notices were filed with the Department of Natural Resources, Division of Natural Gas, last week to drill two new oil wells here and to redrill the Everett H. Jones, Hadley No. 1 in section 23, township 4 S., range 14 W.

Morton and Doley will drill the Coast Line No. 2 in section 31, township 4 S., range 13 W. Harold C. Morton filed notice to drill the Gish 2-A in section 8, township 4 S., range 14 W., the report said.

ASSORTED GASES

In addition to the millions of cubic feet of illuminating gas consumed annually for heating and glass-working operations, other gases such as hydrogen, oxygen, nitrogen, argon and neon, are also needed for lamp manufacture. Hydrogen and oxygen are made by electrical decomposition of water, while the other gases are obtained by distillation of liquid air.

WESTINGHOUSE OPERATES A "TORTURE CHAMBER" TO MAKE CERTAIN THAT THE LAMPS IT MANUFACTURES FOR ROUGH DUTY ARE UP TO SPECIFICATIONS. In its life test laboratories, lighted bulbs are bruised, shaken, thumped and dropped in tests for ruggedness.
