Local Small Fry Cage Teams Drop Three, Win One

Boys who have been attending the Torrance YMCA City Recreation basketball clinics, which have been held each Saturday morning at the local high school for the last five weeks, had a chance to show how much they had learned by representing the local "Y" in four divisions of play at the Los Angeles 28th street "Y" last Saturday afternoon.

The "E" team showed a vast improvement in losing, 16-9, in the first game. A. Tate led the winners in scoring with 8 points, Bob Moon was high for the losers with four.

The 28th street "D's," behind the sharpshooting of Pettors and Duvernay, who hit for 18 and 16 points respectively, swamped the locals, 48-15. Bruce Smith, of the losers, collected 5 counters.

The Torrance "C's" dropped a 58-29 decision to the host five. Hill, of the winners, smacked in 14 points from a guard position. Robert Buchanan was high man for the locals, scoring 13. This 28th street team appears to be the best "C" aggregation in Southern California YMCA circles.

Bob LeWilliams scored 8 points for the Torrance "B's" as they copped the last game, 29-21, to prevent a clean sweep by the host teams.

Parents who furnished transportation and accompanied the 35 boys were: George Chlanda, Major and Mrs. Max Kaiser, and L. C. Nichol. Other cars were furnished and driven by Paul Smith Jr., L. Milton Isbell, Torrance "Y" secretary, and Elmer "Red" Moon.

WHAT OUR 1,000,000TH METER MEANS TO YOUR FAMILY BUDGET!

It's one of the reasons why Gas costs you less today than in 1939!

If you will compare your present costs of living with what you paid in 1939, you'll find that everything has gone up about two-thirds. Almost everything, that is, except gas! Happily, the price of gas has stayed down... even lower than in 1939.

One reason is that we've added so many new customers. In fact, we have just connected our 1,000,000th gas meter. These new customers have helped when they happened to live where they could be served by existing facilities.

Additional revenue from the sale of gas to more and more customers has contributed its part to offset steadily rising expenses. But keeping on the right side of the ledger has been no easy accomplishment.

As costs have gone up and major projects were needed, even new customers haven't always made it easier.

Many thousands of new home owners, for example, have located where gas-main extensions were required to serve them. Taking care of them has actually added to our operating expenses. (Extensions today cost us 2 1/2 to 3 times more than in 1939.)

Again, in order to provide an additional supply of gas for this enormously growing area, we participated in one of the largest natural gas projects on record. The mammoth \$70,000,000 Texas-California pipeline was constructed from the nearest practical source, some 1200 miles away, and is now in operation. Materials and labor, too, are at an all time high... and taxes, payrolls and even the cost of gas in the field—have climbed steadily.

Dependable, low-cost service is just one of the reasons why virtually everyone in Southern California uses gas. You too can afford to use natural gas for all four uses in your home—for cooking, water heating, house heating and refrigeration.

Standard Heating Oils are distilled 100% to burn cleanly and without waste. Every drop's a drop of heat—smoke is all refined out, won't blacken your walls.
