

New Courses at El Camino College Open

El Camino College has added to its list of industrial and technical instructors for fall semester courses men from the International Derrick and Equipment Co., Standard Oil Co., National Supply and Union Oil Co. These instructors have been engaged to teach subjects in their special fields.

Registration for these courses open to any one interested in taking the courses either for credit or simply on an audit basis. To become enrolled in the courses, it is necessary only to appear at the college on the evening indicated and at the time specified.

60 YEARS AGO—1898

Steel for the highest class of ships under construction in the United Kingdom was exported from Pittsburgh. The United States, new leader in steel production, was now able to export without depriving the armed press of metal for the Spanish-American War.

YOUTH CLUB MEMBERS—Just a few members of the Good Gang of 116,000 boys and girls of the metropolitan area who are regularly enrolled in 46 Community Chest youth clubs and other agencies such as Boy Scouts and Camp Fire Girls, which provide wholesome activities for leisure time and citizenship training. Sign up for a few hours service as a Community Chest volunteer to help provide youth service, and for other health, welfare and veterans agencies included in the annual appeal for 159 Red Feather organizations.

Scout Leader Calls Attention to 'Round-Up'

Calling on all residents of the Los Angeles Area Council to participate in the Annual "Round-Up" of the Boy Scouts of America, Alfred E. Hopkins, organization and extension chairman declared this week that "we in the Los Angeles area must measure up to the records being set up throughout the rest of the country."

A nationwide event, the Round-Up is designed to "enable us to contribute to a better America by going forward in our service to boyhood, to grow as we have had the habit of doing, through the years," declared Hopkins.

Since 1910, when Scouting was first established in the United States, 14,710,853 persons have been members of the Boy Scouts of America, he stated. Men from all walks of life, he continued, have devoted themselves to developing Scouting into a movement, second to none in the country as a character building and citizenship training organization for young men.

However, Hopkins mentioned that there is a great need for more volunteer leaders and sponsoring institutions to enable more boys and young men of Los Angeles to have the fun and adventure of Scouting. He added that the present Round-Up is designed to spotlight these needs, so that every boy within range, who wants to be a Scout, may be able to realize this ambition.

In line with reaching this goal, the Los Angeles Area Council has planned a series of special events, the principal part of which will be the Ranch Open House where all Scout Units will invite prospective new members to be their guests at a big feed where the guests will be introduced into the game of Scouting.

Atomic Energy Film to Open Museum Series

"Atomic Energy" will be the theme of the first program in the fall series of documentary films to be presented at the Los Angeles County Museum in Exposition Park, starting Friday, Oct. 8 at 8 p. m., according to James H. Breasted, Jr., director of the Museum.

Six films depicting the whole cycle of thought and thinking about atomic energy in the present day generation will be shown. Their titles are: "Atomic Energy," "Tale of Two Cities," "Operation Crossroads," "Where Will You Hide?," "Does It Matter What You Think?" and "Grass Roots."

There are ten programs in the series, one each Friday evening for ten weeks. The documentary film programs given by the Museum, free to the public, are the most outstanding entertaining and educational feature of any institution in the west.

Themes of other programs in the present fall documentary series, presented each week until Dec. 10 are: "Natural Resources," "United Nations," "Elections," "Aviation," "Early Documentary Film," "Fine Arts," "Housing and City Planning," "Education," and "Mountains."

If you want to forget all your other troubles, wear tight shoes.

In the army they can't make you do anything but they can make you wish that you had.

Just about the time you think you can make both ends meet someone moves the ends.

Obstacles are those frightful things you see when you take your eyes off your goal.

HOG-TIED—Little Ronnie Osborne, 2, of Phoenix, Ariz., makes certain his dog, Hash, won't stray far from home during the current National Dog Week, by putting a stout rope around the pet's neck. The two are inseparable friends.

TELLS THE PRESIDENT—Weaver H. Jones, 1318 West 221st street, got considerable publicity for his cause when he carried this large placard through downtown Los Angeles streets during President Truman's visit last week. (Los Angeles Times Photo).

Many Industrial Courses Offered at El Camino College This Fall

Four Torrance men who are employed at National Supply Company and International Derrick and Equipment Company are teaching industrial classes being offered at El Camino College this semester.

Registration was taking place this week, but there still is time to enter, according to college officials. One of the courses also is being offered from 12 noon to 2:30 p. m., for the convenience of swing shift employes.

Following is the schedule of industrial courses, the instructors, hours and other information:

Course	Instructor	Time
Plate and Structural Layout	Richard Davis	Wednesday 7:30 p. m. (Section 1)
Mr. Davis is a foreman at International Derrick and Equipment Co. The course is of interest to structural steel men.		
Plate and Structural Layout	C. I. Butterfield	Friday 12:30 p. m. (Section 2)
Mr. Butterfield is a foreman at International Derrick and Equipment Co. This course provides instruction for swing shift people who will not be able to attend the industrial classes in the evening.		
Blueprint Reading	Thomas R. Bell	Tuesday 7:30 p. m.
Mr. Bell is in the training department at Standard Oil of California. This course presents information regarding blueprints that should be helpful to the shop man having to interpret blueprints and make sketches.		
Physical Properties of Petroleum	F. M. Noble	Monday 7:10 p. m.
Study of light distillates—gasoline through gas oil including kerosene and naphtha gas oil. This may be followed by a second course going through the heavy distillates.		
Shop Mathematics	James A. Obole	Thursday 7:30 p. m.
Mr. Obole is a Supervisor at National Supply, Torrance.		
Shop Mathematics	James A. Obole	Wednesday 7:30 p. m. (Classes held at National Supply)
This is the advanced class which follows the work done last semester. The text is "Shop Mathematics" by Stude and Margolis. Mr. Obole, who taught the beginning class in Shop Mathematics, will also teach the advanced.		
Industrial Relations	Paul K. Doyle	Wednesday 7:10 p. m.
Mr. Doyle is with the Industrial Relations Department in the Union Oil Company at the Wilmington plant. The Prentice-Hall series will be used as a text in this course. Present industrial relations problems in regard to labor relations, hours, wages, etc., will be considered.		
Technical Instruments	F. M. Noble	Thursday 7:10 p. m.
The use of instruments used in industry for measuring length, area, volume, weight and pressure. There will probably be a course offered second semester continuing with the measurement of temperature and electrical magnetic measurements.		
Time and Motion Study	Karl E. Hansen	Tuesday 7:10 p. m.
This course will be taught by Mr. Hansen, superintendent of Industrial Relations, National Supply Company. The text used will be "Motion and Time Study" by Barnes. Films will be used to illustrate techniques.		

WATCH THAT WHEELBASE

The car's wheelbase is more than doubled when a trailer is attached, and makes a great deal of difference in allowing proper clearance when driving. The added weight, too, makes a very considerable change in the braking effect.

Boiled down to its essentials good public relations means simply making friends with the public.

Museum Will Open Exhibit of Resources

An exhibition revealing how the world's valuable resources such as soil, water and forests have been and continue to be destroyed by man will open Oct. 24, it was announced by Director James H. Breasted.

The exhibition points out the injury that has been inflicted by the hand of man and shows the pattern for recovery which must be followed if civilization is to survive.

According to engineers and those familiar with the situation only 132 of the earth's surface is capable of providing all the food necessary to support the world's population of two billion people.

These two billion humans are rapidly destroying the "good earth" by allowing it to erode away and be washed into the sea where it is lost to man's use. At the same time the world's population is increasing beyond all bounds.

Cooperating with the Museum in presenting the exhibition are the U. S. Forestry Service, U. S. Geological Survey, U. S. Soil Conservation Service, U. S. National Park Service, Los Angeles Bureau of Power and Light, Los Angeles Chamber of Commerce, Metropolitan Water District, Colorado River Association and the Associated Press.

L.A. Schools Simply Need More Rooms!

Los Angeles city is seriously considering the erection of Quonset-type school buildings to provide temporary classrooms to relieve present crowded conditions.

Los Angeles has 28,175 pupils on 825 half-day sessions in 117 schools, with another 247 waiting to get into kindergarten classes, officials said. The system needs 103 classrooms unless temporary facilities are provided. Cost will be met by the sale of \$2,500,000 of school bonds, voted at a previous election.

You need not tell all the truth unless to those who have a right to know it all. But let all you tell be truth.

—Horace Mann
There is no evil we cannot face or fly from, but the consciousness of duty disregarded.
—Daniel Webster

Ranchos Will Get Phones

Telephone installations in the Seaside Ranchos subdivision will begin by Nov. 15, it was learned today from the Associated Telephone Company.

The cable for the lines was shipped from the east last week and will be delivered at the Ranchos during the next week. Crews will immediately erect the aerial facilities in the tract and will be ready to install instruments in six weeks, the manager, H. C. Vaupel, said yesterday.

Mobilization of Industry for War Told

American industry today is much better prepared for war mobilization than it was on Dec. 7, 1941, according to Lieut. Gen. Le Roy Lutes, commander of Army Service forces during the World War I.

General Lutes is now the ranking member of the munitions board under Defense Secretary Forrestal. The munitions board determines the military requirements of the three services and plans for quick industrial mobilization in the case of a national emergency of war.

The nation today is far ahead on pre-war planning, the general said, and is prepared for an emergency.

DRIVING VISIBILITY
One of five fatal traffic accidents occurs because of poor visibility. Drive with special care and always try to keep your windshield clean.

MILLIONTH Postwar telephone added

How we've put in telephones almost three times as fast as ever before in the West

1. Here is Ashley Stone of Sacramento, California, whose daddy and mother got the millionth telephone we've added since V-J Day. To make this gain, we've actually had to install three million telephones... for many of our customers have moved their homes and businesses. Telephones we serve are now at an all-time high... over 3,630,000.

2. We've literally built a city spread over the West... hundreds of new buildings and major additions. New wire has been strung... new cables laid... an astounding total of three million miles. And we're rushing still more construction—half a million dollars worth, every day—to meet the public demand for service.

3. An amazing amount of new equipment of all kinds has gone to work. We've filled three times as many orders as were waiting on V-J Day. To add these million telephones, we had to get \$400,000,000 of new money from investors. Orders still pour in, and our job is not yet done. But we're working at it mightily hard.

4. Millions of new working dollars... needed to extend and improve service... must come, not from telephone bills, but from thousands of people who put their savings to work in the telephone business. To attract these working dollars, we must pay a reasonable amount for their use. This depends on the sale of our services at fair and adequate prices.

The Pacific Telephone and Telegraph Company
More than 70,000 people working together to furnish ever-better telephone service to the West
