While most prices expanded like popcorn...

THE PRICE OF GAS STAYED DOWN!

#### GAS COSTS YOU LESS TODAY THAN IN 1939

There's as much difference between most prewar and present prices as between a kernel of corn before and after popping. The prices of almost everything you buy have doubled or tripled. One exception is gas! It didn't go up in price. Gas actually costs you less today than in 1939.

The popcorn comparison aptly applies to our expenses too. They're the largest in our history. Extensions to serve new customers, for example, cost us 2 1/2 to 3 times more than before the war. But we have kept down the price of gas to you by 1) serving more gas to more people... 60% more customers than ten years ago... and 2) striving constantly to find new ways to achieve greater efficiency and more economical operation.

Perhaps you have never stopped to consider just how low the cost of gas is. This economy... and superior performance in modern automatic appliances... is why gas is used so widely in Southern California for cooking, water heating, home heating and refrigeration.
