CIRCUS DOCTOR, by J. Y. Henderson.

This story is an interesting description of practical living and adventure. In it are many experiences of the doctor who cares for the animals and people in circus life. In his own words the author sums it up: "I have had a wonderful time, ever since Henry Ringling North first took me around to introduce me to the circus. I think I have learned more about animals and human beings than I could have anywhere else. I have learned how The Greatest Show on Earth works; how cooperative people can be, people from all walks of life and from all countries in the world."

OUR DESERT NEIGHBORS, by Edmund Jaegar

When you last spent that weekend in the desert didn't you wonder what that tiny animal might be that you saw disappearing in the sage brush? Who made those strange sounds at night; and a dozen other questions for which there was no immediate answer? Mr. Jaegar has written a most amusing, and informative book about small animals, reptiles and birds. Though written out of close observation and scientific knowledge, these stories are wholly informal and entertaining.
