* FORD—KING OF ALL CARS

Our Esteemed Fathers SAID NO!

Boys don't try it—Torrance people won't want them. We haven't sold anything but American made Fords and Mercurys since 1921... Remember our reputation...

WE SAID YES!

Yes we will too bring to Torrance a car we think is going to be one of the most popular ones on the road soon! They're PRICED RIGHT and BUILT BY FORD and are the sweetest handling car you'll ever have the pleasure of driving — We think they're "THE NUTS."

CHAS. SCHULTZ, Jr. BOB PECKHAM

Here is a car that meets today's traffic conditions. A car that is really maneuverable... drives easier, parks easier. Today's driving is increasingly short haul... to school, postoffice and market... CONSUL was designed around this basic idea stripped of all unnecessary weight and unnecessary overhang. A lighter, smaller quality car that has comfort, safety, economy and maneuverability.

Consul offers long-trip comfort for 5 adults. Deep, beautifully-upholstered seats run full width of car, are cradled between axles for restful riding. Front seat is readily adjustable. All 4 doors are full width—open wide so it's easy to get in and out.

Ease of handling and built-in safety are perhaps the outstanding features of the Consul, new English-built Ford. In official road tests, the Consul proved exceptionally steady on curves at high speeds. It braked just as smoothly at 60 MPH as at 15 MPH—without side sway.

The Consul has all the advanced features in modern auto design — including new-type overhead valve engine offers 4-cylinder economy with unusual power and pep. Large bore and short stroke means reduced piston speed with less wear, greater smoothness and longer engine life.

One-piece, curved windshield for full vision. Pendant-type clutch and brake pedals for more leg room and less road noise.

High efficiency hydraulic brakes for quick stops.

Gas tank filler cap in rear for added convenience.

Body and chassis welded into one piece for greater strength.

But don't take our word for it—come in and see for yourself. We'll be glad to arrange a demonstration. Bring your whole family—it's America's most exciting family car. (Ask about easy payment plan).

Enjoy pullman comfort—dependent front wheel suspension with double-acting shock absorbers.

Snappy acceleration for tight places in traffic. Top speed is a comfortable 70 MPH.

For easy shifting—new-type hydraulically actuated clutch.

Amazingly easy to park—100-inch wheel base. Yet adult passengers enjoy full head and leg room.

Large luggage space—15 cubic feet. Enough room for family suitcases.

* FORD—KING OF ALL CARS

THE ZEPHYR SIX is luxuriously upholstered. Here indeed are all those refinements that distinguish a really fine car. Wide deep-sprung seats, comfortable arm-rests front and back, plenty of room to lounge in comfort during the longest journey, and safety glass all around for your protection.

ENGINE. New-type overhead valve engine offers 6-cylinder economy with unusual power and pep. Large bore and short stroke means reduced piston speed with less wear, greater smoothness and longer engine life.

TRANSMISSION. 8 inch diameter clutch — dry-single plate spring cushioned—hydraulic operation from pedal to heavy duty ball-bearing thrust release. Remote control steering column shift. Light action synchromesh on second and third gears. Helically cut constant mesh gears. Three forward speeds. Oil capacity of transmission: 2 1/4 U.S. pints approx.

BODY. All-steel welded integral construction with all seats located between the axles. Safety glass all around. One-piece curved type windshield and rear light. Hand operated vent windows in front doors. Cloth headlining. Safety design push-button door handles. Bull-in barrel lock in right front door handle. Adjustable full width tubular construction-berth type front seat. Spacious 15 cu. ft. luggage compartment accessible from outside of car. Spare wheel housed in well in luggage compartment floor.

STANDARD EQUIPMENT. Includes dual windshield wipers with mechanically operated camshaft driven vacuum pump booster, flush type headlamps mounted in front fender, separate parking lamps, two flush-mounted combination tail and stop lights, rear license plate illumination lamps, interior lights, two swivel type sun visors, two ash trays in front, one in rear, semaphore type direction indicators operated by self-canceling switch on steering wheel, rear view mirror and built-in fresh air ventilation system.
