WORSHIP HOUR—11:00 A.M.
EVENING SERVICES—7:30 P.M.

Major Research Projects Outlined by Smog Officer

Four major research projects, including search for an effective auto exhaust control device, were outlined in a special report submitted to the County Board of Supervisors Tuesday by the Air Pollution Control Officer Smith Griswold.

Thirty-one County employees, four nationally recognized technical consultants, and eight independent research or laboratory agencies were identified as being involved in the smog projects.

"The research activities of the district were detailed by Griswold to the supervisors following a request for such a report by Supervisor Hahn last May 31.

In making the report, Griswold pointed out that the district research projects include a variety of subjects of importance to an early solution to the smog problem.

"We are in the mopping up stages as far as local smog research is concerned," said Griswold, "and our big job is to apply present research findings to the immediate job of controlling smog."

Now Four Projects

"At the present time, four major research projects are involving the most effort by district personnel. Each of these is of immediate importance to the control of the present air pollution problem."

Griswold said the projects were aimed at finding solution to the baffling auto exhaust pollution problem; an extensive air sampling and analysis program to identify unknown contaminants in the local smog picture and to point out significant source areas of air pollution; laboratory and field analysis of specific contaminants emitted by various industrial-commercial operations; and meteorological studies of wind patterns to determine their effect on smog formations and as a basis for future zoning of industrial plants in Los Angeles City.

Experts Retained

To augment laboratory and research activity and validate findings made by district personnel, Griswold said four nationally recognized technical consultants have been retained by the APCD on a contractual basis.

The four men were identified by Griswold as Dr. A. J. Haagen-Smit, biochemist at the California Institute of Technology; Dr. Francis Blacet of the University of California, expert in photochemistry; Dr. Ulric Bray of Bray Chemical Company and specialist in petroleum research and refinery operations; and Dr. H. F. Johnston, professor of chemical engineering at the University of Illinois.

Griswold said contracts for specific technical studies of smog exist between the district and the University of California; University of Southern California, Chaney Laboratory, Air Pollution Foundation, U. S. Bureau of Mines, California Institute of Technology, Beckman Instrument Corporation, and Consolidated Engineering Corporation.

Cooperation Cited

Griswold explained that the Air Pollution Control District is working very closely with all authorities in the air pollution field to avoid duplication of expensive and time consuming research and to expedite the development of needed scientific knowledge on smog.

"Cooperative evaluation results in a more uniform understanding and agreement in a field that has been far too controversial," he said.

"Even though research activity must be continued on certain important subjects, there should be no doubt that the district now knows enough to pursue

Summer Leisure Programs Rate Close Attention

It is the goal of public recreation to find something for youth to do that they enjoy doing and at that same time develop habits and skills that will help this youth to grow in character. American cities today are the centers of American civilization and culture. They are also the centers of the world's vice and crime.

Combats Crime

Public recreation departments attempt to schedule constructive leisure time recreational activities for youth to keep them out of trouble. Recreation helps to develop character and culture and combat vice and crime.

Because delinquency is a direct result of spare time that is unguided, every city has had to face the task of making it easy for all youth to spend their spare time pleasantly and to advantage.

Variety Unlimited

Public recreation offers the opportunity to the youth to find fun and pleasure through healthy recreation pursuits under skilled leadership. The variety of wholesome recreational pursuits offered to every child also provides opportunity for individuals to realize potentialities he or she may possess for excelling in some field whether it be sports, arts, crafts, music, etc. The danger of damage to a child's character by his being constantly a failure is virtually eliminated because so many possibilities to succeed are present.

Outlets Provided

Not only is recreation an end unto itself in that it is engaged in for the happiness and pleasure it brings; but the participants in the program under skilled guidance, are helped in achieving skills and discovering potentialities that develop strong character and provide healthy outlets for natural youthful aggressions.

A supervised recreation program is a must in the city life of this modern world.

IRON INCIDENT

Iron is said to comprise about four per cent of the earth's crust.

TV, Other Appliances Are Stolen

Burglars who cut a window screen before unlocking the window, entered and removed several articles of value Sunday night at a home at 2382 W. 246th St., Lomita.

The resident, Harley K. West, was absent at the time.

Turning off the electrical current at the master switch, the thieves carried out a TV set and cabinet, a vacuum cleaner, and food mixer. Sheriff's deputies said total value of the loot is \$350.

Sieskes To Address Lutherans

Intern Pastor Luther Sieskes will deliver a sermon on "Follow Christ" at 8 and 10:45 a.m. services Sunday in First Lutheran Church.

Pastor Paul Wenske will be in Sacramento preaching the ordination service for Ralph Herman, past intern at First Lutheran here.

The Chancel Choir will sing together with the Woman's Quartette at the late service. Orville Sletten, superintendent of Sunday School, announced that it will begin at 9:30 a.m.

At the 7 p.m. evening service children of the Daily Vacation Bible School will lead in singing. An Open House for parents of pupils will follow.

Torrance Marine Aids Bayonet Tactics Test

Marine Pvt. Bill R. Satterfield, son of Mr. and Mrs. Bert S. Satterfield, of 21009 Victor St., is participating with the 4th Marine Regiment in the evaluation of the newest type of bayonet fighting at Kaneohe Bay, Hawaii. The new system teaches the individual to follow the rules and movements of boxing.
