## YOUR PROBLEMS

by Ann Landers

### "He Has a Hungry Ego"

Dear Ann: I love to knit. My husband says this is a sign of a weak mind. He claims anyone who can sit for hours and do the same thing over and over must be slightly feeble-minded. This burns me up, especially when he does some rather peculiar things and thinks nothing of it.

During the football season he had the TV turned on one game and the radio tuned in on another. He ran from the living room to the sun porch and acted excited. I knew good and well he didn't know what was going on either place.

During the elections he pulled the same stuff. When I asked him who was winning in New York he said "Vanderbilt." (He knew it was somebody with loads of money but that was all.)

I'd appreciate it if you'd say something in print about this. I'm getting fed up with his attacks on my mentality just because I like to knit—especially when his behavior is so odd.

—PORT CHESTERETTE  
Knitting is not a sign of a weak mind. It requires skill and can be extremely intricate. Any woman who can knit an argyle sock has my undying admiration. During the war I knit two pairs of simple G.I. socks and was politely told I could do my country a great service if I knit for the Germans.

I don't agree that your husband's behavior indicates he's unbalanced. Giving the appearance of taking in two activities at once makes him feel superior. The fact that he falls between the chairs and gets very little from either doesn't enter his mind. "Overly busy" people have hungry egos. They're interested not so much in achievement as the illusion of efficiency created by organized confusion. With such a man, a little compliment can go a long way. Try it.

Dear Ann Landers: Please forgive me for not signing my name to this letter but there's enough trouble in our family as it is.

How can I get it through my 14-year-old's head that she should not entertain boy friends in a room with the door closed—even if they ARE dancing?  
She keeps telling me if I trusted her it wouldn't make
