Salaries of School Employee Are Adjusted

Job descriptions and salaries of Torrance Unified School District employees came under the eye of the Board of Education Tuesday night, as it made some changes in line with recommendations of the State Cooperative Personnel Services.

Because of the growth of the district, the board requested the survey, covering all non-teaching employees and comparing their duties and salaries with those in more than 50 private firms and government agencies in Los Angeles County. The survey covered more than a million workers.

In some cases, duties for jobs were altered or salaries raised to bring them into line with comparable jobs elsewhere. The salary revisions will cost an additional \$1400 each month.

The last survey of district employees was made in 1955. Mushrooming growth of the district, however, has greatly increased the number of employees and variety of services. The district now has 340 clerks, custodians, grounds-men, maintenance personnel, and other necessary jobs. School cafeterias employ 107 persons.
