EDISON CO ADDS HALF MILLION MORE METERS

Southern California Edison Co., has passed the 1,500,000 mark in installed electric meters, it was announced today by G. L. Blanchard, district manager.

In calling attention to the milestone, Blanchard noted that the Edison Co. has been in a period of record expansion to provide electrical service for the huge numbers of new residents, businesses and industrial plants coming into central and Southern California.

"It was just seven years ago — in April, 1951 — that we added our millionth meter to the system," he said. "This means that approximately a million and a half people have moved into our service territory since then."

In contrast to that spectacular growth, it took from 1896, when the company was incorporated under its present name, 1938—42 years—to pass the half million mark in meters, and 13 years, from 1938 to 1951, to reach a million.

Blanchard pointed out that Edison serves about 4,300,000 people in all or part of 10 counties.

FARM EFFICIENCY
The U. S. soil conservation experts estimate if all the farms in the country used the best practices for maximum production, the crop output could be increased 75 per cent.
