

SERMON TO CONTRAST POWERS

Is atomic force the basic power and substance of being or is there spiritual power transcending electrical and gas-ous forces? Questions of this kind are considered in the Lesson-Sermon "Is the Universe, Including Man, Evolved by Atomic Force?" read in all Christian Science Churches on Sunday.

So do the trades customers are enjoying right now from the man who can afford to trade high. Have Polyethylene bag... Will travel

A goldfish's life is not an easy one. Hungry cats, careless kids, and forgetful adults are hazards the average run-of-the-stream goldfish puts up with every day.

His troubles begin in a tank in a pet store, aquarium, or five-and-ten. There's no privacy, the food is just average—and eventually a net cuts the surface of the water and heads for him. In the resulting splash and panic, a goldfish can get hurt.

Fortunately, that danger has been eliminated recently for many goldfish by a new development: fish in bags. They're carefully put into

polyethylene bags filled with water. Food is added, along with an oxygen-producing chemical, and the bag is sealed. Bags are displayed, and buyers can make—and take home—their choice.

The same qualities that enable polyethylene to hold live goldfish without damage make it ideal for other delicate jobs. It's used to protect phonograph records, electronic equipment, and bunches of grapes. Matter of fact, you'll find it just about everywhere—wrapped around everything. It's one of the products made in Torrance by the men and women of CARBIDE.
