

EEC Journalists to Interview Vice President Nixon Saturday

Journalism students of El Camino College will participate in an interview of Vice President Richard Nixon, when they attend the California Newspaper Assn. convention this week end.

The vice president's interview will occur on Saturday morning, giving the El Camino students an opportunity of speaking with the prominent Californian along with representatives of other junior colleges affiliated with CNPA. The convention will be held at the Statler-Hilton in Los Angeles.

COLLEGE DELEGATES will be welcomed to the conclave Friday afternoon, when publishers sponsor a college reception in their honor. Officers of CNPA will serve as hosts at the buffet.

The El Camino delegation, all affiliated with the college newspaper, the Warwhoop, will view the presentation of awards to outstanding news publications of the state at a Saturday morning breakfast at which Governor Pat Brown will make the awards.

Brown was the subject of the special college interview session in San Francisco, where CNPA held its convention a year ago.

VICE PRESIDENT Nixon will make the major address of the convention Saturday noon, with the local students in attendance. Following the lunch-

Film on Cancer To Be Screened By Local Moose

"An American city of 75,000 population . . . erased from the living . . . transformed to a ghost town . . . wiped off the map . . . by a subtle killer too small to be seen."

Artfully framing shock imagery against poetic narration, a film entitled "The Other City" will be presented for public viewing at the Torrance Moose Lodge, 1744 W. Carson St., next Tuesday, Feb. 9th, at 7:30 p.m. This is a story of how cancer could turn a living city into a statistic.

Charles Ross Britt, chairman of the Civic Affairs committee for the Torrance Moose Lodge, has invited the American Cancer Society to present the film at the lodge hall as a community service program. Miss Terry M. Klosterman will represent the Society at the program. A doctor will be available to answer questions from the audience.

ONE OUT OF four Americans will some day have cancer. Among those who face cancer, 75,000 die needlessly every year. They could be saved through earlier diagnosis and better treatment.

If one city—almost the size of Torrance—became a ghost town every year—its population wiped out by a baffling disease that defied medical science—it would make world headlines and arouse people everywhere to emergency action. Communities throughout the land would be alerted by leaders recognizing that if it could happen to the people of "The Other City," it could happen to them.

So it is with cancer. Except that cancer does not strike down entire populations. Cancer strikes individuals. Neither, fortunately, does cancer wholly defy medical science. Many cancers are curable. Cancer, however, does still kill a quarter-million Americans annually, and 75,000 of this number needlessly.
