Porpoise Room Plans Exciting Entertainment

A trio of musical "greats," plus the current attraction The Ink Spots, spangle the coming-attractions-guide at Marineland Restaurant on the Palos Verdes peninsula, an nounces owner George M. Foster.

Virtually all of the presentations in the dining establishment's "Porpoise Room" have recently been and continue to be living legends of the musical world, reviving the nostalgic sounds and styles of the late 20's, the 30's and early 40's.

Following The Ink Spots in the "Porpoise Room" will be a return engagement, beginning Aug. 23, of the original Hoosier Hot Shots, famous madcap stars of comedy and song. Clyde McCoy, a great Dixieland jazzman known as "The Sugar Blues Man," brings his wah wah trumpet and band to Marineland Restaurant on Sept. 21. Returning for a third appearance is Red Nichols and his celebrated Five Pennies. The famed star of American jazz and his golden cornet open Oct. 25.

U.S. Orders More Genie Air Missiles

More nuclear-armed MB-1 Genie rockets have been ordered for the U.S. Air Defense Command arsenal.

Another contract for quantity production of the air-to-air Genie was awarded to the Douglas Aircraft Company, the U.S. Air Force announced today.

Genie's defensive nuclear power is in around-the-clock operational readiness aboard all-weather, manned interceptors at bases throughout the United States, the Air Force said.

...THE \$5 1/2 MILLION contract brings the total value of Douglas awards for the rocket to \$100 million since the program started, C. R. Able, vice president-defense programs, said.

Capable of destroying air-breathing missiles or an enemy formation of enemy bombers with one nuclear punch, Genie has been a prime weapon of the Air Defense Command since 1957.

IT PRESENTLY is major armament aboard the F-89J Scorpion, F-101B Voodoo, and F-106 Delta Dart. Once launched, Genie's force cannot be avoided by defensive maneuver or deflected by counter measures, the Air Force said.

Able said that Douglas, under a separate Air Force development contract, is also conducting an MB-1 Genie improvement program, calling for development of a new rocket motor.

Aeroflet-General Corp., manufacturer of the present motor, is developing the new one under a subcontract to Douglas.

Home Buyers Given Hints

Protective home purchasers often pose the question: "How can I tell if this home has enough electrical capacity for all of my family's needs — today and tomorrow?"

In many cases, points out Southern California Edison Co., these people have had the right experience in the pres-

homes of lights that flicker when appliances are turned on, frequent blown fuses or tripped circuit breakers, motors in appliances that just don't come up to speed, or extension cords strung around the room because of too few electrical outlets.

G. L. BLANCHARD, Edison district manager, says that in the case of Medallion Award-winning homes, fortunately, the guesswork is eliminated about wiring and electrical capacity.

"By definition," Blanchard says, "a home or apartment qualified to display the Medallion emblem has modern circuitry, numerous and conveniently located electrical outlets and sufficient electrical capacity coming through the main service entrance to meet all the family's present and contemplated future power requirements.

"THIS IS WHAT we mean by 'full housepower,'" he says. "A Medallion Award home has provision for at least 20 circuits, lighting that decorates as well as illuminates and several of the most-wanted but in major electrical appliances.
