IT'S A FACT...ABOUT ERMA WORLD'S FIRST ELECTRONIC BOOKKEEPER

ERMA CAN SPOT YOU—IN JUST 32 MILLIONTHS OF A SECOND!

That's how fast checks are processed by ERMA, Bank of America's new Electronic Recording Method of Accounting. Here's how ERMA works: the numbers on each ERMA check are printed with a special magnetic ink containing microscopic specks of iron. When a check goes through ERMA's electronic "reader", each number is magnetized and sends out an electric impulse which is recorded by a computer. Even though a check may be folded or crumpled, ERMA reads it accurately, computes your statement in moments, without error. That's our ERMA—and she works only at Bank of America!

ERMA KNOWS ARABIC!

ERMA can't read handwriting. ERMA's language is made up of arabic numbers shaped in a certain way so that ERMA can read them at the speed of light—and without making a mistake.
