## Lounge Dresses for Leisure

Riding in the wake of the wave of popularity which recently swept the muumuu into America from Hawaiian shores is the LOUNGEDRESS! Compared to the new spring loungedresses, the muumuu is decidedly last year's style — although both fulfill the same fashion need.

Spring leisure dresses have shape enough to look disciplined, but not enough to require foundations. They offer a great deal more variety in fabrics since the muumuu was basically a floral cotton print.

The loungedress will be seen in terry cloths, Arnel jerseys, stretch denims, cotton sateens, as well as the airy batiste, dotted swiss and miracle fabrics.

Styles are as varied as those of sportswear and sleepwear combined. The shift, cropped at the knee or above, promises to be favored, but there will also be A-line flares, tent shapes and "baby dresses."

The shift which falls loosely from a high yoke, looks slightly high-waisted and as innocent as a baby dress, is the likely successor to the muumuu's success. This shift, as well as most of the loungedresses, will slip over the head — although a few have buttons or hidden zippers.

## Elegance at Home

New spring versions of the loungedress place the emphasis on elegance, while still retaining the easy informality of at-home fashions. The ruffled margins and romantic floral prints found in new lounge styles highlight a growing trend to more elegance at home.

## New Fabrics

Delightful child-art prints have resulted in a charming collection of new fabrics for spring. Enormous flowers, jagged lines and childish scribbles are a few of the unique designs to be found in this group of cottons for sportswear.
