Know Your Traffic Laws

Curb marking — those painted red, yellow, green, or white in a business area — are confusing to some drivers. A lack of understanding sometimes causes motorists to park in areas not designed for parking, according to Torrance police officers.

Illegal parking in restricted zones can bring a citation, just because the driver has not learned the meaning of the various colors on the city curbs.

The California Vehicle Code explains the meaning of these colored curbs, and the markings are uniform throughout California.

ACQUAINT yourself with these markings so you will know how the curb is restricted, police officers say. It may save you the bother of answering an illegal parking citation. Curb markings are outlined by the California Vehicle Code (CVC) in Section 11458:

"Whenever local authorities enact local parking regulations and indicate them by the use of paint upon curbs, the following colors only shall be used, and the colors indicate as follows:

(a) Red indicates no stopping, standing, or parking, whether the vehicle is attended or unattended, except that a bus may stop in a red zone marked or signposted as a bus loading zone.

(b) YELLOW indicates stopping only for the purpose of loading or unloading passengers or freight for such time as may be specified by local ordinance.

(c) White indicates stopping only for loading or unloading of passengers for such time as may be specified by local ordinance or for the purpose of depositing mail in an adjacent mailbox.

(d) Green indicates time limit parking specified by local ordinance.

"Regulations indicated as above provided shall be effective upon such days and during such hours or times as may be prescribed by local ordinances."

IN GENERAL practice, red zones are placed where parking would cause a hazard to vehicle or pedestrian traffic; yellow zones are placed near business establishments that need places for delivery trucks to park for delivery to or from the establishment; white zones are placed in front of public buildings such as theaters, churches, and auditoriums where passengers in large numbers can be discharged or picked by vehicles; and green zones are placed near such establishments as banks, post office buildings, and others where a limited parking time — usually 15 or 20 minutes — is advisable to handle a high turnover of cars.

IT MAY BE like talking about a pitcher's no-hit game before it's over, but Torrance has completed five months of 1962 without a fatal traffic accident within the city. Statistics compiled by the Traffic Bureau of the Torrance Police Department show the following figures for the first five months of 1961 and 1962:

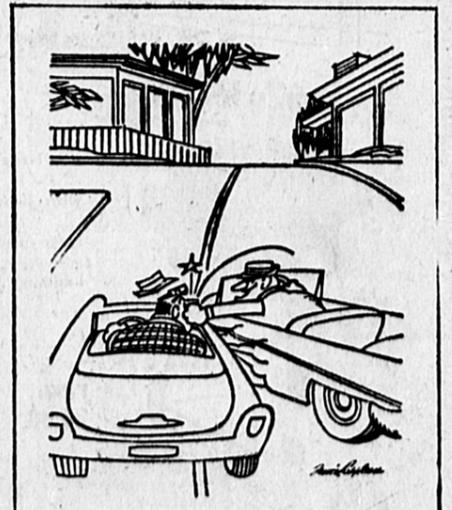

Injury Accidents		
Month	1961	1962
January	39	46
February	43	35
March	43	65
April	43	41
May	40	48
June	39	—

Noninjury Accidents		
Month	1961	1962
January	57	33
February	44	48
March	64	46
April	49	56
May	55	69
June	50	—

Police logged 11 injury accidents and 5 noninjury accidents during the first three days of June. Five fatal accidents had been logged in the corresponding period of 1961 with one in January, three in February, and one in April.
