OLDSMOBILE JETFIRE
 AT
Ronald E. Moran, Inc.

JETFIRE BY OLDSMOBILE—An exciting new sports coupe, the Oldsmobile Jetfire, is the first American production car to be powered by a turbo-charged, fluid injection aluminum V-8 engine. A revolutionary concept in engine design, the Turbo-Rocket engine combines supercharging with ultra high-compression for outstanding performance in all driving ranges. The new engine delivers 215 horsepower, utilizing a highly efficient 10.25 to 1 compression ratio and operating on already available premium grade gasoline. To be available in limited production, the Jetfire is distinguished by its hardtop design, dual windshields on the hood, distinctive Jetfire emblems and a wide satin finish aluminum band extending along the side of the car from front to rear. Included as standard equipment at no extra cost, the Jetfire features bucket seats and a center console with turbo-charger performance gauge. A three-speed manually operated synchromesh transmission is standard. Available at extra cost are the 4-S Hydra-Matic drive and four-speed synchromesh transmission, both with stick shift control mounted in the console.
