How to make good telephone service even better...

Long Distance service is faster when you call by number

You'll find your Long Distance Operator can put your call through much quicker if you give her the out-of-town number you want... rather than just the name and address. That way, you see, you won't have to wait for her to get the number from "Information" in the town you're calling. So why not start a Long Distance list... by jotting down the number when the operator reports it to you.

look 'em up—jot 'em down—then call

You know, it's awfully easy to get telephone numbers "turned around" in your head. So to get the right number, it's a good idea to look it up in the telephone book... jot it down on a slip of paper... then make your call.
