See New Chevrolet At Paul's Tomorrow

Expanded to include a third series of cars, and boasting more significant advances than ever incorporated in a model in the low-price field, the widely discussed new Chevrolets make their first local appearance at Paul's Chevrolet showroom, 1640 Cabrillo Ave., tomorrow.

For the 1953 market bodies have been completely re-designed. All cars have increased power, with special emphasis on a new power train that includes a new engine and improved automatic transmission. In performance, in economy, in driving and riding qualities, exterior and interior appointments, the latest Chevrolet models contribute importantly to automotive progress, states Paul Loranger, owner of the local agency.

Features of the new cars range throughout the bodies and chassis. Of major interest: 1—A new 115-horsepower "Blue Flame" engine and a refined Powerglide automatic transmission re-engineered for greater operating economy and faster pickup. The so-called "standard" engine also moves up to 180 horsepower, a gain of 17.4 per cent over 1952.

2—Roomier and stronger bodies with greatly expanded visibility. All have curved, one-piece windshields from which the center divider has been eliminated. Other body construction highspots include front swingout hinges to provide easier entrance; fold-away front seat backs in two-doors; and wrap-around rear windows.

3—Operating advances cover the automatic choke on all cars, softer, smoother brake action, easier steering, even more reliable starting in damp weather, static-free ignition, softer front and rear springs for improved ride, and higher capacity generator.
