**GRIDDLE SPATTER SHIELD**

Large gas ovens become even larger on some models. Rack supports remove easily to permit you to roast a huge turkey.

### Gas gives you flame-kissed flavor AND NOT A WHIFF OF SMOKE!

LAY a steak on the broiler of a new automatic gas range... slide the tray under the clean blue flame... close the broiler door... and get ready for wonderful eating. The rich juices will flow when you cut your steak because the goodness is sealed in. Flame heat really broils.

Your kitchen will be smoke-free during broiling because smoke and spatter disappear in the live gas flame. Melted fats drain beneath the grid...

are sheltered from the direct heat. That's why gas broiling is clean—no smoke. Your kitchen stays comfortable, too, because the closed broiler door keeps the heat inside performing magic with meat.

What's more, the broilers of new automatic gas ranges are easy to wash. So why not see the new models at dealers' or your Gas Company? They're beautiful. And they cost less to buy... less to operate.
