Strict Measures Against Traffic Violators Asked

Public attitudes toward careless and reckless drivers must be reversed if the number of automobile accidents in California is to be held down, a Los Angeles casualty insurance executive warned members of Optimist Club at a dinner at the Ding How Cafe, Carson and Cabrillo sts., recently. J. T. Blalock, vice president of Pacific Indemnity Company, said that the motoring public must be made to realize that traffic violations are serious.

Stiffer Penalties Blalock recommended increased enforcement, stiffer penalties, professional driver training of youths and increased education of all motorists designed to bring about a more mature and responsible outlook.

Blalock said that any reduction in the number of accidents would necessarily bring a reduction in insurance rates.

Insurance Too Expensive "Insurance rates for automobiles have become too expensive for some people," he said. "Minimum protection for the family car with a driver under 25 in California's

TIPS ON BUYING CHILDREN'S WEAR

Mothers, you can save many dollars each year if you are alerted to points in buying. Here are the questions to remember when buying clothes— IS IT WARM? Many warm garments do not permit excess body moisture to escape—porous materials, such as wool, do! The proper fabrics can help prevent colds. SERVICEABILITY? Can a garment be cleaned, mended or altered easily? These factors should be considered carefully. WILL IT SHRINK? Read labels carefully or get the merchant's assurance. IS IT STYLE-WISE? Stylish garments help give the youngster poise and self-confidence. So — be sure to check a garment's real value in terms of long service, cleanability, its mending and alteration qualities and whether it will bring out the best in a lad's or girl's appearance. TIPS ON PROPER SHOE FITTING GIVEN

By DR. JOSEPH LELYVELD
Chm. National Foot Health Council

1. Have both feet measured for length and width, with each foot bearing weight. Pull out the toe of the stocking and straighten the child's toes to insure that measurement is taken of the longest toe. The correct size should fit the larger foot.

2. The widest part of the foot should fit into the widest part of the shoe, called the ball, at both little—and large-toe joints.

3. The length and width of his foot can be proved by having the child stand with full weight on his toes. The correct length leaves a space of one-half to three-quarters of an inch between the end of the longest toe and the end of the shoe. The correct width allows the leather to be drawn slightly together between the fingers. Shoes that fit correctly should not press or hurt when new, slip at heels, or pinch either toes or heels. Slipping or pinching may cause corns or blisters.

4. As a final check have your child walk around the store on tip toes.

5. At short, regular intervals growing feet should be measured.

6. Take your child with you when buying shoes, observe the above points, and take plenty of time. Good feet are a necessity for good health.
