Here's how the nation's telephone system has grown

INVENTED 1876	1,000,000 1899	30,000,000 1946	50,000,000 1953
---------------	----------------	-----------------	-----------------

It took 23 years to install the first million; yet 20,000,000 telephones have been installed in the United States since 1946.

50,000,000 Telephones Now Serve the Nation

In the West alone, more than 6,000,000 telephones are at work

1. America's 50 millionth telephone went into service in the White House office of President Eisenhower just a few days ago. Yet, only 77 years ago, America's telephone system consisted of little more than a wire strung through an attic in Boston. Today telephone service binds together the great nation it helped to build. In the 77 years since its invention, the telephone has become an important part of the American way of life... a means of chatting with friends... an indispensable tool of commerce... a vital link in our vast chain of defense.

3. In the Pacific West we've added telephones even faster than the nation as a whole. Since January, 1946, Pacific Telephone alone has added over 2,225,000 telephones. This has nearly doubled the number at work. We've also improved equipment to make your telephone serve you better.

2. About 5,300 telephone companies serve the United States. Of these, more than 200 are located in the Pacific West. Working together they have made the world's best telephone service available at a reasonable price... well within the means of nearly everyone.

Each telephone we add makes yours more valuable

Each time a new telephone is installed, your telephone becomes more useful. For each new telephone means you can call more people. More can call you. Thus, every day, your telephone service increases in value, while it remains low in cost.

YOUR TELEPHONE IS ONE OF TODAY'S BEST BARGAINS
